ESSAY. Write your answer in the space provided or on a separate sheet of paper.

| 9) | 9) Name the six steps in the financial planning process and give an example of one | activity that would occur at |
|----|------------------------------------------------------------------------------------|------------------------------|
| | each step. | |

Answer: Many possibilities but overall cover these topics:

- Step 1 Make SMART goals. Establish your financial goals: determine short, medium and long-term goals.
- Step 2 Consider current financial position: Cash flow, budget, balance sheet and net worth. Review spending habits and cash flow. Make your personal financial statements and budget.
- Step 3 Calculate various alternatives to reach the goals. Identify alternate plans. Review different options that would enable you to reach your various goals successfully
- Step 4 Select and implement a plan. Start the required savings, or insurance etc. previously determined. Be prepared to make specific financial decisions based on your discipline and risk tolerance and realistic cash flow.
- Step 5 Evaluate your plan: monitor the progress of each component of the plan. Check if the plan is working and you are on track after a few months, and at least once a year.
- Step 6 Revise your plan if it is not working out. Or if your circumstances have changed, update your goals and plans appropriately. Review your willingness to follow the plan and adjust it according to your current lifestyle.

MULTIPLE CHOICE. Choose the one alternative that best completes the statement or answers the question.

- 81) Explain why an increase in your income may or may not necessarily mean an increase in net worth.
 - Answer: 1. It does not make any difference what you make, it matters what you do with it.
 - 2. If you get a raise of \$1000 per month you could spend it on nicer clothes and entertainment and add nothing to your assets over the year.
 - 3. If you used the \$1000 to reduce your debt (e.g., pay down a student loan, or pay off a credit card balance), that would increase your net worth.
 - 4. If you contributed the \$1000 each month to your investment account, you would increase your net worth.
 - 5. Most people will spend the money sitting in their bank account, but if you 'pay yourself first', by contributing automatically to a savings or investment account, then your net worth will increase painlessly.

- 8) C
- 9) Many possibilities but overall cover these topics:
 - Step 1 Make SMART goals. Establish your financial goals: determine short, medium and long-term goals.
 - Step 2 Consider current financial position: Cash flow, budget, balance sheet and net worth. Review spending habits and cash flow. Make your personal financial statements and budget.
 - Step 3 Calculate various alternatives to reach the goals. Identify alternate plans. Review different options that would enable you to reach your various goals successfully
 - Step 4 Select and implement a plan. Start the required savings, or insurance etc. previously determined. Be prepared to make specific financial decisions based on your discipline and risk tolerance and realistic cash flow.
 - Step 5 Evaluate your plan: monitor the progress of each component of the plan. Check if the plan is working and you are on track after a few months, and at least once a year.
 - Step 6 Revise your plan if it is not working out. Or if your circumstances have changed, update your goals and plans appropriately. Review your willingness to follow the plan and adjust it according to your current lifestyle.

Answer Key Testname: CH01

- 40) FALSE
- 41) Possible options:
 - 1. Financial planner: potential conflict of interest, driven by commissions
 - 2. Bank adviser: only able to sell in-house product or incompetent advice
 - 3. Investor education websites: dedicated to improve investor know-how, make sure it is legitimate and get a second opinion before following any online advice
 - 4. Financial institution websites: watch for conflict of interest, bias, can be useful for certain calculations etc.
 - 5. Government agency websites: generally safe but limited to general recommendations
 - 6. Referrals from friends: ask critical questions
- 42) C
- 43) FALSE
- 44) C
- 45) TRUE
- 46) A
- 47) There are many possibilities, however, they must be specific, measurable, action oriented, realistic and time bound.

Examples: Save \$200 per month for four years in order to have \$5000 to purchase a second-hand Honda Fit.

Save \$1000 per month from age 30 to 65 in order to be able to retire at age 60 with a similar lifestyle to pre-retirement.

Pay off a student loan of \$20 000 over five years by making payments of \$400 per month at an interest rate of 7.5 percent.

- 84) FALSE
- 85) D
- 86) D
- 87) TRUE
- 88) C
- 89) B
- 90) C
- 91) A
- 92) Many possibilities.

Cons:

It can lead to personal debt getting out of control.

Some credit, such as credit cards, are a very expensive source of liquidity.

If people are already using credit a lot, then have an actual financial set back, they may not be able to keep up debt payments.

Available credit can be cancelled/reduced by the lender at any time and this may happen right when you need it most. From 2000 -2018, the level of household debt relative to disposable income increased, the delinquency rate on 90-day non-mortgage debt rose 3.5 percent to 1.12 percent, so there is clearly risk.

Pros:

If used judiciously, credit cards provide a "interest free" loan for a few weeks each month.

Holding funds in an emergency fund that pays no interest (which is the current economic environment) is not an attractive option for an investor.

There are many very low interest sources of credit available to people these days and if only used for emergencies, this can be more cost effective than holding funds in a liquid emergency fund.
