CHAPTER 9

LONG-LIVED ASSETS

CHAPTER STUDY OBJECTIVES

1. ***Calculate the cost of property, plant, and equipment.*** The cost of property, plant, and equipment includes all costs that are necessary to acquire the asset and make it ready for its intended use. All costs that benefit future periods (that is, capital expenditures) are included in the cost of the asset. When applicable, cost also includes asset retirement costs. When multiple assets are purchased in one transaction, or when an asset has significant components, the cost is allocated to each individual asset or component using their relative fair values.

2. ***Apply depreciation methods to property, plant, and equipment.*** After acquisition, assets are accounted for using the cost model or the revaluation model. Depreciation is recorded and assets are carried at cost less accumulated depreciation. Depreciation is the allocation of the cost of a long-lived asset to expense over its useful life (its service life) in a rational and systematic way. Depreciation is not a process of valuation and it does not result in an accumulation of cash. There are three commonly used depreciation methods:

Method	Effect on Annual Depreciation	Calculation
Straight-line	Constant amount	(Cost − residual value) ÷ estimated useful life (in years)
Diminishing-balance	Diminishing amount	Carrying amount at beginning of year × diminishing-balance rate
Units-of-production	Varying amount	(Cost − residual value) ÷ total estimated units-of-production × actual activity during the year

Each method results in the same amount of depreciation over the asset's useful life. Depreciation expense for income tax purposes is called capital cost allowance (CCA).

3. ***Explain the factors that cause changes in periodic depreciation and calculate revised depreciation for property, plant, and equipment.*** A revision to depreciation will be required if there are (a) capital expenditures during the asset's useful life; (b) impairments in the asset's fair value; (c) changes in the asset's fair value when using the revaluation model; and/or (d) changes in the appropriate depreciation method, estimated useful life, or residual value. An impairment loss must be recorded if the recoverable amount is less than the carrying amount. Revisions of periodic depreciation are made in present and future periods, not retroactively. The new annual depreciation is determined

by using the depreciable amount (carrying amount less the revised residual value), and the remaining useful life, at the time of the revision.

4. ***Demonstrate how to account for property, plant, and equipment disposals.*** The accounting for the disposal of a piece of property, plant, or equipment through retirement or sale is as follows:
(a) Update any unrecorded depreciation for partial periods since depreciation was last recorded.
(b) Calculate the carrying amount (cost – accumulated depreciation).
(c) Calculate any gain (proceeds > carrying amount) or loss (proceeds < carrying amount) on disposal.
(d) Remove the asset and accumulated depreciation accounts at the date of disposal. Record the proceeds received and the gain or loss, if any.
An exchange of assets is recorded as the purchase of a new asset and the sale of an old asset. The new asset is recorded at the fair value of the asset given up plus any cash paid (or less any cash received). The fair value of the asset given up is compared with its carrying amount to calculate the gain or loss. If the fair value of the new asset or the asset given up cannot be determined, the new long-lived asset is recorded at the carrying amount of the old asset that was given up, plus any cash paid (or less any cash received).

5. ***Record natural resource transactions and calculate depletion.*** The units-of-production method of depreciation is generally used for natural resources. The depreciable amount per unit is calculated by dividing the total depreciable amount by the number of units estimated to be in the resource. The depreciable amount per unit is multiplied by the number of units that have been extracted to determine the annual depletion. The depletion and any other costs to extract the resource are recorded as inventory until the resource is sold. At that time, the costs are transferred to cost of resource sold on the income statement. Revisions to depletion will be required for capital expenditures during the asset's useful life, for impairments, and for changes in the total estimated units of the resource.

6. ***Identify the basic accounting issues for intangible assets and goodwill.*** The accounting for tangible and intangible assets is much the same. Intangible assets are reported at cost, which includes all expenditures necessary to prepare the asset for its intended use. An intangible asset with a finite life is amortized over the shorter of its useful life and legal life, usually on a straight-line basis. The extent of the annual impairment tests depends on whether IFRS or ASPE is followed and whether the intangible asset had a finite or indefinite life. Intangible assets with indefinite lives and goodwill are not amortized and are tested at least annually for impairment. Impairment losses on goodwill are never reversed under both IFRS and ASPE.

7. ***Illustrate the reporting and analysis of long-lived assets.*** It is common for property, plant, and equipment, and natural resources to be combined in financial statements under the heading "property, plant, and equipment." Intangible assets with finite and indefinite lives are sometimes combined under the heading "intangible assets" or are listed separately. Goodwill must be presented separately. Either on the balance sheet or in the notes, the cost of the major classes of long-lived assets is presented. Accumulated depreciation (if the asset is depreciable) and carrying amount must be disclosed either on the balance sheet or in the notes. The depreciation and amortization methods and rates, as well as the annual depreciation expense, must also be indicated. The company's impairment policy and any impairment losses should be described and reported.

Under IFRS, companies must include a reconciliation of the carrying amount at the beginning and end of the period for each class of long-lived assets and state whether the cost or revaluation model is used.
The asset turnover ratio (net sales ÷ average total assets) is one measure that is used by companies to show how efficiently they are using their assets to generate sales revenue. A second ratio, return on assets (profit ÷ average total assets), calculates how profitable the company is in terms of using its assets to generate profit.

TRUE-FALSE STATEMENTS

1. All long-lived assets must be depreciated for accounting purposes.

Answer: False

Bloomcode: Knowledge
Difficulty: Easy
Learning Objective: Calculate the cost of property, plant, and equipment.
Section Reference: Property, Plant, and Equipment
CPA: Financial Reporting
AACSB: Analytic

2. All long-lived assets that are included in property, plant, and equipment must be used in the operations of the business.

Answer: True

Bloomcode: Knowledge
Difficulty: Easy
Learning Objective: Calculate the cost of property, plant, and equipment.
Section Reference: Property, Plant, and Equipment
CPA: Financial Reporting
AACSB: Analytic

3. If long-lived assets are intended for sale, they are included in property, plant, and equipment.

Answer: False

Bloomcode: Knowledge
Difficulty: Easy
Learning Objective: Calculate the cost of property, plant, and equipment.
Section Reference: Property, Plant, and Equipment
CPA: Financial Reporting
AACSB: Analytic

4. If an item of property, plant, and equipment is recognized as an asset, it is probable that the company will NOT receive economic benefits from the item.

Answer: False

Bloomcode: Knowledge
Difficulty: Easy
Learning Objective: Calculate the cost of property, plant, and equipment.
Section Reference: Property, Plant, and Equipment

CPA: Financial Reporting
AACSB: Analytic

5. Any non-refundable taxes incurred on the acquisition of an asset would be expensed at the time of acquisition.

Answer: False

Bloomcode: Knowledge
Difficulty: Easy
Learning Objective: Calculate the cost of property, plant, and equipment.
Section Reference: Property, Plant, and Equipment
CPA: Financial Reporting
AACSB: Analytic

6. The expenditures necessary to bring the asset to the location and condition necessary to make it ready for its intended use would be included in the cost of the asset.

Answer: True

Bloomcode: Knowledge
Difficulty: Easy
Learning Objective: Calculate the cost of property, plant, and equipment.
Section Reference: Property, Plant, and Equipment
CPA: Financial Reporting
AACSB: Analytic

7. Costs that benefit future periods are included in a long-lived asset account, and are called operating expenses.

Answer: False

Bloomcode: Comprehension
Difficulty: Easy
Learning Objective: Calculate the cost of property, plant, and equipment.
Section Reference: Property, Plant, and Equipment
CPA: Financial Reporting
AACSB: Analytic

8. If insurance is incurred transporting the asset to its final position, this insurance will be added to the cost of the asset.

Answer: True

Bloomcode: Knowledge
Difficulty: Easy

Learning Objective: Calculate the cost of property, plant, and equipment.
Section Reference: Property, Plant, and Equipment
CPA: Financial Reporting
AACSB: Analytic

9. Subsequent to the acquisition of an asset, insurance costs would be added to the cost of the asset.

Answer: False

Bloomcode: Comprehension
Difficulty: Easy
Learning Objective: Calculate the cost of property, plant, and equipment.
Section Reference: Property, Plant, and Equipment
CPA: Financial Reporting
AACSB: Analytic

10. If paid by the purchaser, freight charges and insurance during transit are included in the cost of equipment.

Answer: True

Bloomcode: Comprehension
Difficulty: Easy
Learning Objective: Calculate the cost of property, plant, and equipment.
Section Reference: Property, Plant, and Equipment
CPA: Financial Reporting
AACSB: Analytic

11. An architect's fee for the plans for a new building would be included in the cost of the land improvements.

Answer: False

Bloomcode: Comprehension
Difficulty: Easy
Learning Objective: Calculate the cost of property, plant, and equipment.
Section Reference: Property, Plant, and Equipment
CPA: Financial Reporting
AACSB: Analytic

12. A basket purchase of long-lived assets requires that the fair values be assigned based on the cost of each asset.

Answer: False

Bloomcode: Comprehension

Difficulty: Easy
Learning Objective: Calculate the cost of property, plant, and equipment.
Section Reference: Property, Plant, and Equipment
CPA: Financial Reporting
AACSB: Analytic

13. The cost of land improvements is NOT depreciated because land improvements typically do NOT decline in value.

Answer: False

Bloomcode: Knowledge
Difficulty: Easy
Learning Objective: Calculate the cost of property, plant, and equipment.
Section Reference: Property, Plant, and Equipment
CPA: Financial Reporting
AACSB: Analytic

14. Under IFRS, companies have two models they can choose between to account for their property, plant, and equipment: the cost model or the revaluation model.

Answer: True

Bloomcode: Knowledge
Difficulty: Easy
Learning Objective: Apply depreciation methods to property, plant, and equipment.
Section Reference: Depreciation
CPA: Financial Reporting
AACSB: Analytic

15. Most Canadian companies reporting under IFRS do NOT use the revaluation method when accounting for their long-lived assets.

Answer: True

Bloomcode: Knowledge
Difficulty: Easy
Learning Objective: Apply depreciation methods to property, plant, and equipment.
Section Reference: Depreciation
CPA: Financial Reporting
AACSB: Analytic

16. Land improvements decline in service potential with time.

Answer: True

Bloomcode: Knowledge
Difficulty: Easy
Learning Objective: Apply depreciation methods to property, plant, and equipment.
Section Reference: Depreciation
CPA: Financial Reporting
AACSB: Analytic

17. Depreciation is the systematic allocation of the cost of a long-lived asset, such as property, plant, and equipment, over the asset's physical life.

Answer: True

Bloomcode: Knowledge
Difficulty: Easy
Learning Objective: Apply depreciation methods to property, plant, and equipment.
Section Reference: Depreciation
CPA: Financial Reporting
AACSB: Analytic

18. An asset's cost is allocated to expense over the asset's useful life because the asset is used to help generate revenue over that period of time.

Answer: True

Bloomcode: Knowledge
Difficulty: Easy
Learning Objective: Apply depreciation methods to property, plant, and equipment.
Section Reference: Depreciation
CPA: Financial Reporting
AACSB: Analytic

19. Assets are depreciated over their useful lives even if the use of the asset is NOT directly related to earning profit.

Answer: True

Bloomcode: Knowledge
Difficulty: Easy
Learning Objective: Apply depreciation methods to property, plant, and equipment.
Section Reference: Depreciation
CPA: Financial Reporting
AACSB: Analytic

20. Depreciation is a process of cost allocation.

Answer: True

Bloomcode: Knowledge
Difficulty: Easy
Learning Objective: Apply depreciation methods to property, plant, and equipment.
Section Reference: Depreciation
CPA: Financial Reporting
AACSB: Analytic

21. Residual value is NOT depreciated since the amount is expected to be recovered at the end of the asset's useful life.

Answer: True

Bloomcode: Knowledge
Difficulty: Easy
Learning Objective: Apply depreciation methods to property, plant, and equipment.
Section Reference: Depreciation
CPA: Financial Reporting
AACSB: Analytic

22. Recording depreciation on long-lived assets affects the balance sheet and the income statement.

Answer: True

Bloomcode: Knowledge
Difficulty: Easy
Learning Objective: Apply depreciation methods to property, plant, and equipment.
Section Reference: Depreciation
CPA: Financial Reporting
AACSB: Analytic

23. The units-of-production method of depreciation will result in the highest cash flow for the company.

Answer: False

Bloomcode: Knowledge
Difficulty: Easy
Learning Objective: Apply depreciation methods to property, plant, and equipment.
Section Reference: Depreciation
CPA: Financial Reporting
AACSB: Analytic

24. Subject to acquisition, all costs that relate to that asset are classified as operating expenses.

Answer: False

Bloomcode: Knowledge
Difficulty: Easy
Learning Objective: Apply depreciation methods to property, plant, and equipment.
Section Reference: Depreciation
CPA: Financial Reporting
AACSB: Analytic

25. The Accumulated Depreciation account represents a cash fund available to replace long-lived assets.

Answer: False

Bloomcode: Knowledge
Difficulty: Easy
Learning Objective: Apply depreciation methods to property, plant, and equipment.
Section Reference: Depreciation
CPA: Financial Reporting
AACSB: Analytic

26. In calculating depreciation, both the long-lived asset's cost and useful life are based on estimates.

Answer: False

Bloomcode: Comprehension
Difficulty: Easy
Learning Objective: Apply depreciation methods to property, plant, and equipment.
Section Reference: Depreciation
CPA: Financial Reporting
AACSB: Analytic

27. Under the double diminishing-balance method, the depreciation rate used each year remains constant.

Answer: True

Bloomcode: Knowledge
Difficulty: Easy
Learning Objective: Apply depreciation methods to property, plant, and equipment.
Section Reference: Depreciation
CPA: Financial Reporting
AACSB: Analytic

28. Using the units-of-production method of depreciating factory equipment will generally result in more depreciation expense being recorded over the life of the asset than if the straight-line method

had been used.

Answer: False

Bloomcode: Comprehension
Difficulty: Easy
Learning Objective: Apply depreciation methods to property, plant, and equipment.
Section Reference: Depreciation
CPA: Financial Reporting
AACSB: Analytic

29. Straight-line depreciation will result in a higher profit than the double diminishing-balance method in the early years of an asset's life.

Answer: True

Bloomcode: Comprehension
Difficulty: Easy
Learning Objective: Apply depreciation methods to property, plant, and equipment.
Section Reference: Depreciation
CPA: Financial Reporting
AACSB: Analytic

30. The Canada Revenue Agency does NOT require the taxpayer to use the same depreciation method on the tax return that is used in preparing financial statements.

Answer: True

Bloomcode: Knowledge
Difficulty: Easy
Learning Objective: Apply depreciation methods to property, plant, and equipment.
Section Reference: Depreciation
CPA: Financial Reporting
AACSB: Analytic

31. A company using the diminishing-balance method of depreciation will have higher profit in the early years of the asset.

Answer: False

Bloomcode: Comprehension
Difficulty: Easy
Learning Objective: Apply depreciation methods to property, plant, and equipment.
Section Reference: Depreciation
CPA: Financial Reporting
AACSB: Analytic

32. The amount of an asset's residual value does NOT affect the calculation of depreciation in the units-of-production method.

Answer: False

Bloomcode: Knowledge
Difficulty: Easy
Learning Objective: Apply depreciation methods to property, plant, and equipment.
Section Reference: Depreciation
CPA: Financial Reporting
AACSB: Analytic

33. In the straight-line method, the higher the residual value the greater the profit.

Answer: True

Bloomcode: Comprehension
Difficulty: Easy
Learning Objective: Apply depreciation methods to property, plant, and equipment.
Section Reference: Depreciation
CPA: Financial Reporting
AACSB: Analytic

34. The diminishing-balance method will yield a higher cost of goods sold.

Answer: False

Bloomcode: Knowledge
Difficulty: Easy
Learning Objective: Apply depreciation methods to property, plant, and equipment.
Section Reference: Depreciation
CPA: Financial Reporting
AACSB: Analytic

35. In the diminishing-balance method, the rate of depreciation decreases each year.

Answer: False

Bloomcode: Knowledge
Difficulty: Easy
Learning Objective: Apply depreciation methods to property, plant, and equipment.
Section Reference: Depreciation
CPA: Financial Reporting
AACSB: Analytic

36. In the diminishing-balance method, the depreciation expense on an asset will decrease each year.

Answer: True

Bloomcode: Knowledge
Difficulty: Easy
Learning Objective: Apply depreciation methods to property, plant, and equipment.
Section Reference: Depreciation
CPA: Financial Reporting
AACSB: Analytic

37. In the straight-line method of depreciation, the rate of depreciation remains constant over time.

Answer: True

Bloomcode: Knowledge
Difficulty: Easy
Learning Objective: Apply depreciation methods to property, plant, and equipment.
Section Reference: Depreciation
CPA: Financial Reporting
AACSB: Analytic

38. Once an asset is fully depreciated, no additional depreciation can be taken even though the asset is still being used by the business.

Answer: True

Bloomcode: Knowledge
Difficulty: Easy
Learning Objective: Apply depreciation methods to property, plant, and equipment.
Section Reference: Depreciation
CPA: Financial Reporting
AACSB: Analytic

39. The units-of-production method is ideal for equipment whose production can be measured in units of output.

Answer: True

Bloomcode: Knowledge
Difficulty: Easy
Learning Objective: Apply depreciation methods to property, plant, and equipment.
Section Reference: Depreciation
CPA: Financial Reporting
AACSB: Analytic

40. CRA does NOT allow taxpayers to estimate the useful lives of assets or depreciation rates.

Answer: True

Bloomcode: Knowledge
Difficulty: Easy
Learning Objective: Apply depreciation methods to property, plant, and equipment.
Section Reference: Depreciation
CPA: Financial Reporting
AACSB: Analytic

41. Under CRA, depreciation expense is NOT optional in calculating profit.

Answer: True

Bloomcode: Knowledge
Difficulty: Easy
Learning Objective: Apply depreciation methods to property, plant, and equipment.
Section Reference: Depreciation
CPA: Financial Reporting
AACSB: Analytic

42. The carrying amount of a long-lived asset is the amount originally paid for the asset less anticipated residual value.

Answer: False

Bloomcode: Knowledge
Difficulty: Easy
Learning Objective: Apply depreciation methods to property, plant, and equipment.
Section Reference: Depreciation
CPA: Financial Reporting
AACSB: Analytic

43. Ordinary repairs are costs to maintain the asset's operating efficiency and expected productive life.

Answer: True

Bloomcode: Knowledge
Difficulty: Easy
Learning Objective: Explain the factors that cause changes in periodic depreciation and calculate revised depreciation for property, plant, and equipment.
Section Reference: Revising Periodic Depreciation
CPA: Financial Reporting
AACSB: Analytic

44. A change in the estimated residual value of a long-lived asset requires a restatement of prior years' depreciation.

Answer: False

Bloomcode: Knowledge
Difficulty: Easy
Learning Objective: Explain the factors that cause changes in periodic depreciation and calculate revised depreciation for property, plant, and equipment.
Section Reference: Revising Periodic Depreciation
CPA: Financial Reporting
AACSB: Analytic

45. Additions and improvements to a long-lived asset that increase the asset's operating efficiency, productive capacity, or expected useful life are generally expensed in the period incurred.

Answer: False

Bloomcode: Knowledge
Difficulty: Easy
Learning Objective: Explain the factors that cause changes in periodic depreciation and calculate revised depreciation for property, plant, and equipment.
Section Reference: Revising Periodic Depreciation
CPA: Financial Reporting
AACSB: Analytic

46. Additions and improvements are costs that are incurred to maintain the asset’s operating efficiency, productive capacity, or expected useful life.

Answer: False

Bloomcode: Comprehension
Difficulty: Easy
Learning Objective: Explain the factors that cause changes in periodic depreciation and calculate revised depreciation for property, plant, and equipment.
Section Reference: Revising Periodic Depreciation
CPA: Financial Reporting
AACSB: Analytic

47. An impairment loss is the amount by which the asset’s carrying amount exceeds its recoverable amount.

Answer: True

Bloomcode: Knowledge

Difficulty: Easy
Learning Objective: Explain the factors that cause changes in periodic depreciation and calculate revised depreciation for property, plant, and equipment.
Section Reference: Revising Periodic Depreciation
CPA: Financial Reporting
AACSB: Analytic

48. An impairment loss can only occur in long-lived assets with a finite life.

Answer: False

Bloomcode: Knowledge
Difficulty: Easy
Learning Objective: Explain the factors that cause changes in periodic depreciation and calculate revised depreciation for property, plant, and equipment.
Section Reference: Revising Periodic Depreciation
CPA: Financial Reporting
AACSB: Analytic

49. IFRS allow the reversal of a previously recorded impairment loss.

Answer: True

Bloomcode: Knowledge
Difficulty: Easy
Learning Objective: Explain the factors that cause changes in periodic depreciation and calculate revised depreciation for property, plant, and equipment.
Section Reference: Revising Periodic Depreciation
CPA: Financial Reporting
AACSB: Analytic

50. Under IFRS, at each year end, the company must determine whether or not an impairment loss still exists by measuring the asset's recoverable amount.

Answer: True

Bloomcode: Knowledge
Difficulty: Easy
Learning Objective: Explain the factors that cause changes in periodic depreciation and calculate revised depreciation for property, plant, and equipment.
Section Reference: Revising Periodic Depreciation
CPA: Financial Reporting
AACSB: Analytic

51. Under the revaluation model, the carrying amount of property, plant, and equipment is its fair value plus any subsequent accumulated depreciation less any subsequent impairment losses.

Answer: False

Bloomcode: Knowledge
Difficulty: Easy
Learning Objective: Explain the factors that cause changes in periodic depreciation and calculate revised depreciation for property, plant, and equipment.
Section Reference: Revising Periodic Depreciation
CPA: Financial Reporting
AACSB: Analytic

52. A loss on disposal of a long-lived asset as a result of a sale or a retirement is calculated in the same way.

Answer: True

Bloomcode: Comprehension
Difficulty: Easy
Learning Objective: Demonstrate how to account for property, plant, and equipment disposals.
Section Reference: Disposals of Property, Plant, and Equipment
CPA: Financial Reporting
AACSB: Analytic

53. A long-lived asset must be fully depreciated before it can be removed from the books.

Answer: False

Bloomcode: Comprehension
Difficulty: Easy
Learning Objective: Demonstrate how to account for property, plant, and equipment disposals.
Section Reference: Disposals of Property, Plant, and Equipment
CPA: Financial Reporting
AACSB: Analytic

54. A loss on disposal of long-lived assets can only occur if the cash proceeds received from the asset sale are less than the asset's carrying amount.

Answer: True

Bloomcode: Comprehension
Difficulty: Easy
Learning Objective: Demonstrate how to account for property, plant, and equipment disposals.
Section Reference: Disposals of Property, Plant, and Equipment
CPA: Financial Reporting
AACSB: Analytic

55. The first step in recording a disposal of a long-lived asset is to update that asset's depreciation.

Answer: True

Bloomcode: Knowledge
Difficulty: Easy
Learning Objective: Demonstrate how to account for property, plant, and equipment disposals.
Section Reference: Disposals of Property, Plant, and Equipment
CPA: Financial Reporting
AACSB: Analytic

56. In a disposal of an asset, if the carrying amount of the asset exceeds the proceeds received, profit will increase.

Answer: False

Bloomcode: Comprehension
Difficulty: Easy
Learning Objective: Demonstrate how to account for property, plant, and equipment disposals.
Section Reference: Disposals of Property, Plant, and Equipment
CPA: Financial Reporting
AACSB: Analytic

57. When an asset is retired, there are no proceeds received.

Answer: True

Bloomcode: Comprehension
Difficulty: Easy
Learning Objective: Demonstrate how to account for property, plant, and equipment disposals.
Section Reference: Disposals of Property, Plant, and Equipment
CPA: Financial Reporting
AACSB: Analytic

58. In a retirement of an asset, if the carrying amount of the asset is greater than $1, profit will increase.

Answer: False

Bloomcode: Comprehension
Difficulty: Easy
Learning Objective: Demonstrate how to account for property, plant, and equipment disposals.
Section Reference: Disposals of Property, Plant, and Equipment
CPA: Financial Reporting
AACSB: Analytic

59. A higher trade-in value will increase the profit of the company disposing of an asset.

Answer: False

Bloomcode: Comprehension
Difficulty: Easy
Learning Objective: Demonstrate how to account for property, plant, and equipment disposals.
Section Reference: Disposals of Property, Plant, and Equipment
CPA: Financial Reporting
AACSB: Analytic

60. The cost of natural resources is NOT allocated to expense because the natural resources are replaceable only by an act of nature.

Answer: False

Bloomcode: Comprehension
Difficulty: Easy
Learning Objective: Record natural resource transactions and calculate depletion.
Section Reference: Natural Resources
CPA: Financial Reporting
AACSB: Analytic

61. Conceptually, the cost allocation procedure for natural resources parallels that of property, plant, and equipment.

Answer: True

Bloomcode: Comprehension
Difficulty: Easy
Learning Objective: Record natural resource transactions and calculate depletion.
Section Reference: Natural Resources
CPA: Financial Reporting
AACSB: Analytic

62. Natural resources are often called wasting assets because it is difficult to use the assets in an efficient manner.

Answer: False

Bloomcode: Comprehension
Difficulty: Easy
Learning Objective: Record natural resource transactions and calculate depletion.
Section Reference: Natural Resources
CPA: Financial Reporting
AACSB: Analytic

63. Accumulated depreciation is only recognized on natural resources that have been extracted and sold during the period.

Answer: False

Bloomcode: Knowledge
Difficulty: Easy
Learning Objective: Record natural resource transactions and calculate depletion.
Section Reference: Natural Resources
CPA: Financial Reporting
AACSB: Analytic

64. The diminishing-balance method is the most common method of depreciation for natural resources.

Answer: False

Bloomcode: Comprehension
Difficulty: Easy
Learning Objective: Record natural resource transactions and calculate depletion.
Section Reference: Natural Resources
CPA: Financial Reporting
AACSB: Analytic

65. Natural resources do NOT have to be tested for impairment annually.

Answer: False

Bloomcode: Knowledge
Difficulty: Easy
Learning Objective: Record natural resource transactions and calculate depletion.
Section Reference: Natural Resources
CPA: Financial Reporting
AACSB: Analytic

66. Intangible assets have unlimited life because they have no physical substance.

Answer: False

Bloomcode: Comprehension
Difficulty: Easy
Learning Objective: Identify the basic accounting issues for intangible assets and goodwill.
Section Reference: Intangible Assets and Goodwill
CPA: Financial Reporting
AACSB: Analytic

67. The diminishing-balance method of amortization is the most common method of amortization for intangibles.

Answer: False

Bloomcode: Knowledge
Difficulty: Easy
Learning Objective: Identify the basic accounting issues for intangible assets and goodwill.
Section Reference: Intangible Assets and Goodwill
CPA: Financial Reporting
AACSB: Analytic

68. The amortizable amount of an intangible should be allocated over the shorter of the estimated useful life and legal life.

Answer: True

Bloomcode: Knowledge
Difficulty: Easy
Learning Objective: Identify the basic accounting issues for intangible assets and goodwill.
Section Reference: Intangible Assets and Goodwill
CPA: Financial Reporting
AACSB: Analytic

69. If an intangible with an indefinite life is disposed of, there is no effect on profit.

Answer: False

Bloomcode: Knowledge
Difficulty: Easy
Learning Objective: Identify the basic accounting issues for intangible assets and goodwill.
Section Reference: Intangible Assets and Goodwill
CPA: Financial Reporting
AACSB: Analytic

70. A franchise is a contractual arrangement under which the franchisor grants the franchisee the right to sell certain products and/or to provide specific services.

Answer: True

Bloomcode: Knowledge
Difficulty: Easy
Learning Objective: Identify the basic accounting issues for intangible assets and goodwill.
Section Reference: Intangible Assets and Goodwill
CPA: Financial Reporting
AACSB: Analytic

71. Goodwill CANNOT be sold individually as it is part of the business as a whole.

Answer: True

Bloomcode: Knowledge
Difficulty: Easy
Learning Objective: Identify the basic accounting issues for intangible assets and goodwill.
Section Reference: Intangible Assets and Goodwill
CPA: Financial Reporting
AACSB: Analytic

72. Goodwill has an indefinite life.

Answer: True

Bloomcode: Knowledge
Difficulty: Easy
Learning Objective: Identify the basic accounting issues for intangible assets and goodwill.
Section Reference: Intangible Assets and Goodwill
CPA: Financial Reporting
AACSB: Analytic

73. Goodwill should be amortized on the lesser of useful life or 20 years.

Answer: False

Bloomcode: Comprehension
Difficulty: Easy
Learning Objective: Identify the basic accounting issues for intangible assets and goodwill.
Section Reference: Intangible Assets and Goodwill
CPA: Financial Reporting
AACSB: Analytic

74. Impairment losses on goodwill are NEVER reversed.

Answer: True

Bloomcode: Knowledge
Difficulty: Easy
Learning Objective: Identify the basic accounting issues for intangible assets and goodwill.
Section Reference: Intangible Assets and Goodwill
CPA: Financial Reporting
AACSB: Analytic

75. IFRS does allow for reversals of impairment losses on both finite-life and other indefinite-life intangible assets if their value increases in the future.

Answer: True

Bloomcode: Knowledge
Difficulty: Easy
Learning Objective: Identify the basic accounting issues for intangible assets and goodwill.
Section Reference: Intangible Assets and Goodwill
CPA: Financial Reporting
AACSB: Analytic

76. It is NOT necessary to disclose the amount of accumulated amortization on intangible assets in the financial statements.

Answer: False

Bloomcode: Comprehension
Difficulty: Easy
Learning Objective: Illustrate the reporting and analysis of long-lived assets.
Section Reference: Statement Presentation and Analysis
CPA: Financial Reporting
AACSB: Analytic

77. The return on assets is calculated by dividing net income by total assets.

Answer: False

Bloomcode: Knowledge
Difficulty: Easy
Learning Objective: Illustrate the reporting and analysis of long-lived assets.
Section Reference: Statement Presentation and Analysis
CPA: Financial Reporting
AACSB: Analytic

78. The asset turnover ratio indicates how efficiently a company uses its assets to generate sales.

Answer: True

Bloomcode: Comprehension
Difficulty: Easy
Learning Objective: Illustrate the reporting and analysis of long-lived assets.
Section Reference: Statement Presentation and Analysis
CPA: Financial Reporting
AACSB: Analytic

79. Companies must report goodwill separately from property, plant, and equipment, and intangible assets.

Answer: True

Bloomcode: Knowledge
Difficulty: Easy
Learning Objective: Illustrate the reporting and analysis of long-lived assets.
Section Reference: Statement Presentation and Analysis
CPA: Financial Reporting
AACSB: Analytic

MULTIPLE CHOICE QUESTIONS

80. Which of the following would NOT be considered an addition to the capital cost of an asset?
a) HST paid on the asset
b) insurance paid when the asset was in transit from the supplier
c) installation fee when asset is delivered
d) freight costs paid by the purchaser

Answer: a

Bloomcode: Knowledge
Difficulty: Easy
Learning Objective: Calculate the cost of property, plant, and equipment.
Section Reference: Property, Plant, and Equipment
CPA: Financial Reporting
AACSB: Analytic

81. All of the following are examples of property, plant, and equipment EXCEPT
a) equipment.
b) copyright.
c) land.
d) building.

Answer: b

Bloomcode: Knowledge
Difficulty: Easy
Learning Objective: Calculate the cost of property, plant, and equipment.
Section Reference: Property, Plant, and Equipment
CPA: Financial Reporting
AACSB: Analytic

82. An example of operating costs of a long-lived asset would NOT include the following:
a) insurance costs paid after the asset is being used in operations.
b) maintenance costs.
c) repair costs.
d) insurance costs paid before the asset is being used in operations.

Answer: d

Bloomcode: Knowledge
Difficulty: Easy
Learning Objective: Calculate the cost of property, plant, and equipment.
Section Reference: Property, Plant, and Equipment

A.	Long-lived assets	F.	Units-of-production method
B.	Depreciation	G.	Diminishing-balance method
C.	Carrying amount	H.	Operating expenditures
D.	Residual value	I.	Capital expenditures
E.	Straight-line method	J.	Capital cost allowance

_____ 1. Small expenditures that primarily benefit the current period

_____ 2. Long-lived resources that are used in operations and are NOT intended for resale

_____ 3. Cost less accumulated depreciation

_____ 4. An accelerated depreciation method used for financial statement purposes

_____ 5. Results in an equal amount of depreciation each period

_____ 6. Expected cash value of the asset at the end of its useful life

_____ 7. Process of allocating the cost of a depreciable asset over its useful life

_____ 8. Material expenditures that increase an asset's operating efficiency, productive capacity, or useful life

_____ 9. An accelerated depreciation method used for income tax purposes

_____ 10. Estimated useful life is expressed in terms of expected use

258. Match the items below by entering the appropriate code letter in the space provided.

A.	Gain on disposal	E.	Goodwill
B.	Loss on disposal	F.	Depreciation
C.	Trademark	G.	Intangible assets

D. Natural resources H. Research costs

_____ 1. Process of allocating the cost of a depreciable asset to expense over its useful life

_____ 2. Occurs if proceeds of disposal exceed the carrying amount

_____ 3. When carrying amount of asset is greater than the proceeds received from its sale

_____ 4. Long-lived assets replaceable only by an act of nature

_____ 5. Can be identified only with a business as a whole

_____ 6. Examples are franchises and licences

_____ 7. A symbol that identifies a particular company or product

_____ 8. Must be expensed when incurred

LEGAL NOTICE

CHAPTER 9

LONG-LIVED ASSETS

CHAPTER STUDY OBJECTIVES

1. ***Calculate the cost of property, plant, and equipment.*** The cost of property, plant, and equipment includes all costs that are necessary to acquire the asset and make it ready for its intended use. All costs that benefit future periods (that is, capital expenditures) are included in the cost of the asset. When applicable, cost also includes asset retirement costs. When multiple assets are purchased in one transaction, or when an asset has significant components, the cost is allocated to each individual asset or component using their relative fair values.

2. ***Apply depreciation methods to property, plant, and equipment.*** After acquisition, assets are accounted for using the cost model or the revaluation model. Depreciation is recorded and assets are carried at cost less accumulated depreciation. Depreciation is the allocation of the cost of a long-lived asset to expense over its useful life (its service life) in a rational and systematic way. Depreciation is not a process of valuation and it does not result in an accumulation of cash. There are three commonly used depreciation methods:

Method	Effect on Annual Depreciation	Calculation
Straight-line	Constant amount	(Cost − residual value) ÷ estimated useful life (in years)
Diminishing-balance	Diminishing amount	Carrying amount at beginning of year × diminishing-balance rate
Units-of-production	Varying amount	(Cost − residual value) ÷ total estimated units-of-production × actual activity during the year

Each method results in the same amount of depreciation over the asset's useful life. Depreciation expense for income tax purposes is called capital cost allowance (CCA).

3. ***Explain the factors that cause changes in periodic depreciation and calculate revised depreciation for property, plant, and equipment.*** A revision to depreciation will be required if there are (a) capital expenditures during the asset's useful life; (b) impairments in the asset's fair value; (c) changes in the asset's fair value when using the revaluation model; and/or (d) changes in the appropriate depreciation method, estimated useful life, or residual value. An impairment loss must be recorded if the recoverable amount is less than the carrying amount. Revisions of periodic depreciation are made in present and future periods, not retroactively. The new annual depreciation is determined

by using the depreciable amount (carrying amount less the revised residual value), and the remaining useful life, at the time of the revision.

4. ***Demonstrate how to account for property, plant, and equipment disposals.*** The accounting for the disposal of a piece of property, plant, or equipment through retirement or sale is as follows:
(a) Update any unrecorded depreciation for partial periods since depreciation was last recorded.
(b) Calculate the carrying amount (cost – accumulated depreciation).
(c) Calculate any gain (proceeds > carrying amount) or loss (proceeds < carrying amount) on disposal.
(d) Remove the asset and accumulated depreciation accounts at the date of disposal. Record the proceeds received and the gain or loss, if any.
An exchange of assets is recorded as the purchase of a new asset and the sale of an old asset. The new asset is recorded at the fair value of the asset given up plus any cash paid (or less any cash received). The fair value of the asset given up is compared with its carrying amount to calculate the gain or loss. If the fair value of the new asset or the asset given up cannot be determined, the new long-lived asset is recorded at the carrying amount of the old asset that was given up, plus any cash paid (or less any cash received).

5. ***Record natural resource transactions and calculate depletion.*** The units-of-production method of depreciation is generally used for natural resources. The depreciable amount per unit is calculated by dividing the total depreciable amount by the number of units estimated to be in the resource. The depreciable amount per unit is multiplied by the number of units that have been extracted to determine the annual depletion. The depletion and any other costs to extract the resource are recorded as inventory until the resource is sold. At that time, the costs are transferred to cost of resource sold on the income statement. Revisions to depletion will be required for capital expenditures during the asset's useful life, for impairments, and for changes in the total estimated units of the resource.

6. ***Identify the basic accounting issues for intangible assets and goodwill.*** The accounting for tangible and intangible assets is much the same. Intangible assets are reported at cost, which includes all expenditures necessary to prepare the asset for its intended use. An intangible asset with a finite life is amortized over the shorter of its useful life and legal life, usually on a straight-line basis. The extent of the annual impairment tests depends on whether IFRS or ASPE is followed and whether the intangible asset had a finite or indefinite life. Intangible assets with indefinite lives and goodwill are not amortized and are tested at least annually for impairment. Impairment losses on goodwill are never reversed under both IFRS and ASPE.

7. ***Illustrate the reporting and analysis of long-lived assets.*** It is common for property, plant, and equipment, and natural resources to be combined in financial statements under the heading "property, plant, and equipment." Intangible assets with finite and indefinite lives are sometimes combined under the heading "intangible assets" or are listed separately. Goodwill must be presented separately. Either on the balance sheet or in the notes, the cost of the major classes of long-lived assets is presented. Accumulated depreciation (if the asset is depreciable) and carrying amount must be disclosed either on the balance sheet or in the notes. The depreciation and amortization methods and rates, as well as the annual depreciation expense, must also be indicated. The company's impairment policy and any impairment losses should be described and reported.

Under IFRS, companies must include a reconciliation of the carrying amount at the beginning and end of the period for each class of long-lived assets and state whether the cost or revaluation model is used.
The asset turnover ratio (net sales ÷ average total assets) is one measure that is used by companies to show how efficiently they are using their assets to generate sales revenue. A second ratio, return on assets (profit ÷ average total assets), calculates how profitable the company is in terms of using its assets to generate profit.

EXERCISES

Exercise 1

Ed Harris Company was organized on January 1. During the first year of operations, the following expenditures and receipts were recorded in random order in the account, Land:

		Debits
1.	Cost of real estate purchased as a plant site (land and building).	$ 320,000
2.	Legal fees paid at the time of the purchase of the real estate.	6,500
3.	Cost of demolishing building to make land suitable for construction of a new building	12,000
4.	Architect's fees on building plans	14,000
5.	Excavation costs for new building.	24,000
6.	Cost of filling and grading the land.	5,000
7.	Insurance and taxes during construction of building.	6,000
8.	Cost of repairs to building under construction caused by a small fire.	14,000
9.	Interest paid during the year, of which $ 52,000 pertains to the construction period	64,000
10.	Full payment to building contractor.	760,000
11.	Cost of parking lots and driveways	36,000
12.	Property taxes paid for the current year on the land.	4,000
	Total Debits	$1,265,500

		Credits
13.	Insurance proceeds for fire damage.	$10,000
14.	Proceeds from residual of demolished building.	3,500
	Total Credits	$13,500

Instructions

Analyze the above transactions using the columns below. Insert the number of each transaction in the item space and insert the amounts in the appropriate columns.

Item	Land	Land Improvements	Building	Other	Account Title

Solution 1 (15 min.)

Item	Land	Land Improvements	Building	Other	Account Title
1.	$320,000				
2.	6,500				
3.	12,000				
4.			$ 14,000		

5.			24,000		
6.	5,000				
7.			6,000		
8.				$14,000	Fire Loss
9.			52,000	12,000	Interest Expense
10.			760,000		
11.		$36,000			Land Improvements
12.				4,000	Property Tax Expense
13.				(10,000)	Fire Loss
14.	(3,500)				
Totals	$340,000	$36,000	$856,000	$20,000

Exercise 2

Rainbow Logistics purchased land with the intention of building an office. Rainbow also engaged other contractors for fencing, paving, lighting, landscaping, and to remove a dilapidated building to make room for a new office building. The following information relates to these transactions:

1. Purchased land for $350,000.
2. Paid $4,000 for seller's unpaid property taxes.
3. Paid $22,000 to have the dilapidated building removed.
4. Paid a builder $400,000 to design and build the office building.
5. Paid a company $20,000 to grade and clear the land to make it suitable for building purposes.
6. Paid a landscaping company $10,000 for trees and shrubs.
7. Paid a contractor $16,000 for outside lighting around the parking area and sidewalks.
8. Paid $26,000 to have the parking lot paved.
9. Paid a fence builder $15,000 to construct a security fence around the property.

Instructions

Determine the cost of the land, the building, and the land improvements.

Solution 2 (10 min.)

Land = $350,000 + $22,000 + $4,000 + $20,000 = $396,000
Building = $400,000
Land improvements = $10,000 + $16,000 + $15,000 + $26,000 = $67,000

Bloomcode: Analysis
Difficulty: Medium

Exercise 3

Identify the following expenditures as capital expenditures or operating expenditures:

1. Replacement of worn-out gears on factory machinery
2. Construction of a new wing on an office building
3. Painting the exterior of a building
4. Oil change on a company truck
5. Replacing a network server's hard drive, thereby increasing data storage capacity by ten times. No extension of useful life expected
6. Overhaul of a truck motor. One-year extension in useful life is expected
7. Purchased a wastebasket, with an expected useful life of five years, at a cost of $10
8. Painting and lettering of a used truck upon acquisition of the truck

Solution 3 (5 min.)

1. operating

2. capital

3. operating

4. operating

5. capital

6. capital

7. operating

8. capital

Exercise 4

Below are selected entries for Joanna Co.:

1. The $60 cost of repairing a printer was charged to Equipment.
2. The $5,000 cost of a major truck engine overhaul was debited to Repairs Expense. The overhaul is expected to increase the operating efficiency of the truck.
3. The $6,000 closing costs associated with the acquisition of land were debited to Legal Fees Expense.
4. A $600 charge for transportation costs on new equipment purchased was debited to Delivery Expense.
5. Freight cost incurred bringing a new piece of equipment to the plant site was charged to Equipment.

Instructions

For each entry above, make a correcting entry if necessary. If the entry given is correct, then state "No entry required."

Solution 4 (10 min.)

1.	Repairs Expense	60	
	Equipment		60
2.	Vehicles	5,000	
	Repairs Expense		5,000
3.	Land	6,000	
	Legal Fees Expense		6,000
4.	Equipment	600	
	Delivery Expense		600

5. No entry required.

Exercise 5

Below are transactions for Oriel Company:

1. Purchased land for $900,000.
2. Paid $20,000 to demolish building located on land.
3. Paid $3,000 for building permit.
4. Paid $2,000 for architect fees.
5. Paid $3,000 for excavation costs.
6. Paid interest of $22,000 during construction of new building.

7. Paid $960,000 to complete the building.
8. Paid $30,000 to pave the parking lot.
9. Paid $4,000 for underground sprinkler.
10. Ordered new equipment, paid $30,000.
11. Paid $1,500 to install and test new equipment.
12. Paid $250 to insure equipment for one year.
13. Paid $2,500 to paint office walls in the new building.
14. Paid $2,000 to repair equipment.
15. Purchased a truck for $25,000.
16. Paid $250 for truck licence.
17. Paid $60 for oil change on new truck.
18. Paid $15,000 for fences around the new building.
19. Purchased two cash registers for $1,100 each.
20. Paid $2,200 for annual yard maintenance.

Instructions

a) Determine if each item should be capitalized (C) or expensed (E).
b) Determine the balance in the Land account and the Building account.

Exercise 6

Extra Company purchased land for $115,000 with the intention of constructing a new operating facility. The land purchase included a dilapidated building that was removed at a cost of $16,000. The only salvage value from this old building was some materials, that were sold for proceeds of $4,000. Extra had paid surveying costs of $1,800 and legal fees related to land transfer of $6,700. The new building was quickly constructed at a total cost of $422,000. Architectural drawings and permits on the construction of this new facility totalled $18,000 and $10,650, respectively. Insurance premiums of $9,200 are paid annually. The production manager is currently on-site facilitating the production start-up. This manager has an annual salary of $85,000.

Instructions

a) Calculate the acquisition cost of the land. Identify each element of cost clearly.
b) Calculate the acquisition cost of the new building. Identify each element of cost clearly.

Solution 6 (10 min.)

a)	Purchase price	$115,000
	Demolition costs	16,000
	Proceeds from salvaged materials	(4,000)
	Surveying costs	1,800
	Legal fees for land transfer	6,700
	Acquisition cost of land	$135,500
b)	Construction costs	$422,000
	Architectural drawings	18,000

Building permits	10,650
Acquisition cost of building	$450,650

Exercise 7

On August 1, 2024, Mark Leamington Engineering paid $1,000,000 in a lump-sum purchase of land, building, and equipment. The payment consisted of $200,000 cash and a note payable for the balance. An appraisal revealed the following fair values at the time of the purchase:

Land	$500,000
Building	450,000
Equipment	250,000

Instructions

Prepare the necessary journal entry to record this lump-sum purchase (round all percentage calculations to two decimal places).

Solution 7 (10 min.)

Asset	Fair Value	Total Fair Value	% of Fair Value	Cost	Allocated Cost
Land	$ 500,000	$1,200,000	41.67%	$1,000,000	$ 416,700
Building	450,000	1,200,000	37.50%	1,000,000	375,000
Equipment	250,000	1,200,000	20.83%	1,000,000	208,300
Total	$1,200,000				$1,000,000

Aug. 1, 2024	Land	416,700	
	Building	375,000	
	Equipment	208,300	
	Cash		200,000
	Notes Payable		800,000

Exercise 8

Shen Athletics purchased factory equipment with an invoice price of $92,000. Other costs incurred were freight costs, $2,500; installation of wiring and foundation, $2,200; material and labour costs in testing equipment, $700; oil lubricants and supplies to be used with equipment, $500; one-year

fire insurance policy covering equipment, $1,400. The equipment is estimated to have an $8,000 residual value at the end of its five-year useful service life.

Instructions

a) Calculate the acquisition cost of the equipment. Identify each element of cost clearly.
b) If the double diminishing-balance method of depreciation was used, the constant percentage applied to a diminishing carrying amount would be _____.

Solution 8 (10 min.)

a)	Invoice cost	$92,000
	Freight costs	2,500
	Installation of wiring and foundation	2,200
	Material and labour costs in testing	700
	Acquisition cost	$97,400

b) If the diminishing-balance method of depreciation was used, the constant percentage applied to a diminishing carrying amount would be 40% (100% ÷ 5 years) x 2.

Bloomcode: Application

Exercise 9

Dufferin Company uses the straight-line method of depreciation. The company's fiscal year end is December 31. The following transactions and events occurred during the first three years.

2023	July	1	Purchased a new computer system from The Computer Centre for $37,000 cash and shipping costs of $250.
	Nov.	3	Incurred ordinary repairs on computer of $3,280.
	Dec.	31	Recorded 2023 depreciation on the basis of an estimated five-year life and residual value of $1,250.
2024	Dec.	31	Recorded 2024 depreciation.
2025	Jan.	1	Paid $9,800 for a major upgrade of the computer. This expenditure is expected to increase the operating efficiency and capacity of the computer.

Instructions

Prepare the necessary entries. (Show calculations.)

Solution 9 (15 min.)

2023	July	1	Equipment	37,250	
			Cash		37,250

	Nov. 3	Repairs Expense	3,280	
		Cash		3,280
	Dec. 31	Depreciation Expense	3,600	
		Accumulated Depreciation–Equipment		3,600
		[($ 37,250 – $ 1,250) ÷ 5 × 1/2]		
2024	Dec. 31	Depreciation Expense	7,200	
		Accumulated Depreciation–Equipment		7,200
		[($ 37,250 – $ 1,250) ÷ 5]		
2025	Jan. 1	Equipment	9,800	
		Cash		9,800

Exercise 10

On March 31, 2024, Holland Industries purchased assets for $2,500,000 cash. Before completing the purchase, Holland had an appraisal completed to determine the relative value of each of the assets included in the purchase price.

The appraisal indicated that the fair value of the land, if purchased separately, would be $375,000, the building's value is $1,900,000, the manufacturing equipment $192,500, and the office equipment $55,000. In addition to the land, building and equipment, the purchase price includes inventory with a net realizable value of $27,500.

The anticipated life of the building is 25 years, the manufacturing equipment 10 years, and the office equipment five years, with no residual value for any of them. Holland has a December 31 year end.

Instructions

a) Record the purchase on March 31, 2024 (round percentages to one decimal place)
b) Record the depreciation expense for 2024 using the straight-line method assuming the company chooses to prorate depreciation based on the number of months the asset has been in use.

Solution 10 (20 min.)

a) Allocation of cost based on fair values:

	Fair value	Percentage	Allocation of cost
Land	$ 375,000	14.7%	$ 367,500

Building	1,900,000	74.5%	1,862,500
Manufacturing equipment	192,500	7.5%	187,500
Office equipment	55,000	2.2%	55,000
Inventory	27,500	1.1%	27,500
	$2,550,000	100.0%	$2,500,000

Entry to record purchase

Land	367,500	
Building	1,862,500	
Equipment	187,500	
Equipment (office)	55,000	
Merchandise Inventory	27,500	
Cash		2,500,000

b)

Depreciation Expense	78,188	
Accumulated Depreciation–Building		55,875
($1,862,500 ÷ 25) x 9/12		
Accumulated Depreciation–Equipment		14,063
($187,500 ÷ 10) x 9/12)		
Accumulated Depreciation–Equipment (office)		8,250
($55,000 ÷ 5) x 9/12)		

Bloomcode: Application
Difficulty: Medium
Learning Objective: Calculate the cost of property, plant, and equipment.
Section Reference: Property, Plant, and Equipment
Learning Objective: Apply depreciation methods to property, plant, and equipment.
Section Reference: Depreciation
CPA: Financial Reporting
AACSB: Analytic

Exercise 11

On May 5, 2024, Vermilion River Adventures purchased a property for $400,000 cash. The property included the following long-lived assets:

	Appraised Value
Land	$120,000
Building	200,000
Equipment	100,000
Paved area	20,000
Outdoor lighting	10,000
	$450,000

Instructions

a) Give the journal entry to allocate the purchase price between the above assets. Round all amounts to the nearest dollar, if necessary.

b) Prepare a compound journal entry to record depreciation of the long-lived assets on December

31, 2024, assuming the following additional details:

	Useful Life in Years	Residual Value
Building	30	$20,000
Equipment	5	10,000
Paved area	4	-0-
Outdoor lighting	10	-0-

Prorate depreciation based on the number of months the asset has been in use.

Solution 11 (20 min.)

a)

	% of Appraised Value		Allocation of Purchase Price
Land	$120,000 ÷ $450,000 × $400,000	=	$106,667
Building	$200,000 ÷ $450,000 × $400,000	=	177,778
Equipment	$100,000 ÷ $450,000 × $400,000	=	88,889
Paved area	$20,000 ÷ $450,000 × $400,000	=	17,778
Outdoor lighting	$10,000 ÷ $450,000 × $400,000	=	8,888
			$400,000

May 5	Land		106,667	
	Building		177,778	
	Equipment		88,889	
	Leasehold Improvement		17,778	
	Leasehold Improvement (lighting)		8,888	
		Cash		400,000

b)

Depreciation Expense		17,581	
	Accumulated Depreciation–Building		3,506
	[($177,778 – $20,000) ÷ 30] × 8/12		
	Accumulated Depreciation–Equipment		10,519
	[($ 88,889 – $10,000) ÷ 5] × 8/12		
	Accumulated Depreciation–Leasehold Improvements		2,963
	[($17,778 – $0) ÷ 4] × 8/12		
	Accumulated Depreciation–Leasehold Improvements (Lighting)		593
	[($8,888 – $0) ÷ 10] × 8/12		

Bloomcode: Application
Difficulty: Medium
Learning Objective: Calculate the cost of property, plant, and equipment.
Section Reference: Property, Plant, and Equipment
Learning Objective: Apply depreciation methods to property, plant, and equipment.
Section Reference: Depreciation

AACSB: Analytic

Exercise 12

Independent Energy depreciates its property, plant, and equipment assets using the straight-line method. The company's fiscal year end is December 31. The following selected transactions and events occurred during the first three years:

2023 Jan. 1 Purchased equipment from Equipment World for $214,500 on account.

Independent Energy also incurred freight and installation costs of $1,500 and $4,000, respectively.

Sept. 30 Paid for annual insurance of $4,200 and routine maintenance of $1,700 for the machine. The insurance policy expires on September 30, 2024.

Dec. 31 Recorded 2023 depreciation on the basis of an estimated 10-year useful life and residual value of $20,000.

2024 Dec. 31 Recorded 2024 depreciation and impairment loss (if any). Independent Energy conducted an impairment assessment as indicators suggested that an impairment may be possible. It was determined that the recoverable amount of the equipment is currently $160,000. The estimated residual value remained unchanged.

2025 Dec. 31 Independent Energy sold the equipment to Engaged Auto Company for proceeds of $140,000.

Instructions

Prepare the necessary entries. (Show calculations.)

Solution 12 (30 min.)

2023	Jan. 1	Equipment		220,000	
		Accounts Payable			220,000
		($214,500 + $1,500 + $4,000)			
	Sept. 30	Repairs Expense		1,700	
		Prepaid Insurance		4,200	
		Cash			5,900
	Dec. 31	Depreciation Expense		20,000	
		Accumulated Depreciation–Equipment			20,000
		[($220,000 – $20,000) ÷ 10]			
2024	Dec. 31	Depreciation Expense		20,000	
		Accumulated Depreciation–Equipment			20,000
		[($220,000 – $20,000) ÷ 10]			
	Dec. 31	Impairment Loss		20,000	
		Accumulated Depreciation–Equipment			20,000
		Carrying amount = $220,000 – $20,000 – $20,000 = $180,000			
		Impairment loss = $180,000 – $160,000 = $20,000			
2025	Dec. 31	Depreciation Expense		17,500	
		Accumulated Depreciation–Equipment			17,500
		[($160,000 – $20,000) ÷ (10 - 2 years)]			
	Dec. 31	Cash		140,000	
		Accumulated Depreciation–Equipment		77,500	
		Loss on Disposal		2,500	
		Equipment			220,000
		Accumulated depreciation = $20,000 + $20,000 + $20,000 + $17,500 = $77,500			

Carrying amount = $220,000 – $77,500 = $142,500
Gain (loss) on disposal = $140,000 – $142,500 = $(2,500)

Bloomcode: Analysis
Difficulty: Medium

Exercise 13

Das Gym purchased new equipment for $175,000. It is estimated that the equipment will have a $15,000 residual value at the end of its five-year useful service life. The double diminishing-balance method of depreciation will be used.

Instructions

Prepare a depreciation schedule that shows the annual depreciation expense on the equipment for its five-year life. Round all amounts to the nearest dollar.

Solution 13 (10 min.)
Double diminishing-balance rate = (100% ÷ 5) × 2 = 40%

	Carrying amount				Annual	End of Year	
	Beginning		Depreciation		Depreciation	Accumulated	Carrying amount
Year	of Year	×	Rate	=	Expense	Depreciation	End of Year
1	$175,000	×	40%		$70,000	$ 70,000	$105,000
2	105,000	×	40%		42,000	112,000	63,000
3	63,000	×	40%		25,200	137,200	37,800
4	37,800	×	40%		15,120	152,320	22,680
5	22,680	×	40%		7,680*	160,000	15,000

*Adjusted to $7,680 because ending carrying amount should not be less than the expected residual value of $15,000.

Bloomcode: Application
Difficulty: Medium
Learning Objective: Apply depreciation methods to property, plant, and equipment.
Section Reference: Depreciation

AACSB: Analytic

Exercise 14

Randy Automotive purchased equipment on October 1, 2024, at a total cost of $ 150,000. The machine has an estimated useful life of eight years or 100,000 hours, and an estimated residual value of $10,000. During 2024 and 2025, the machinery was used 4,400 and 12,800 hours, respectively.

Instructions

Calculate depreciation expense at December 31, 2024 and December 31, 2025, under the following depreciation methods (round all amounts to the nearest dollar):

	2024	2025
Straight-line depreciation	_____	_____
Units-of-production depreciation	_____	_____
Double diminishing-balance depreciation	_____	_____

Solution 14 (15 min.)

	2024	2025
Straight-line depreciation	$4,375	$17,500
Units-of-production depreciation	$6,160	$17,920
Double diminishing-balance depreciation	$9,375	$35,156

(1) Straight-line depreciation
December 31, 2024 = ($150,000 – $10,000)/8 x 3/12 = $4,375
December 31, 2025 = ($150,000 – $10,000)/8 = $17,500

(2) Units-of-production depreciation
December 31, 2024 = ($150,000 – $10,000)/100,000 = $1.40 x 4,400 = $6,160
December 31, 2025 = ($150,000 – $10,000)/100,000 = $1.40 x 12,800 = $17,920

(3) Double diminishing-balance depreciation
Double diminishing rate = 200%/8 years = 25%
December 31, 2024 = $150,000 x 25% x 3/12 = $9,375
December 31, 2025 = ($150,000 – $9,375) x 25% = $35,156

Bloomcode: Application
Difficulty: Medium
Learning Objective: Apply depreciation methods to property, plant, and equipment.
Section Reference: Depreciation
CPA: Financial Reporting

Exercise 15

Equipment acquired on October 1, 2024, at a cost of $540,000 has an estimated useful life of 10 years. The residual value is estimated to be $55,000 at the end of the equipment's useful life. The company has a December 31 year end.

Instructions

Calculate the depreciation expense for December 31, 2024 and 2025, using:

a) the straight-line method.

b) the double diminishing-balance method.

Solution 15 (10 min.)

a) Straight-line method

2024 $\frac{\$540{,}000 - \$55{,}000}{10 \text{ years}} \times 3/12 = \$12{,}125$

2025 $(\$540{,}000 - \$55{,}000)/10 = \$48{,}500$

b) Double diminishing-balance method

Depreciation rate = 200% ÷ 10 years = 20%

2024 $\$540{,}000 \times 20\% \times 3/12 = \$27{,}000$

2025 $(\$540{,}000 - \$27{,}000) \times 20\% = \$102{,}600$

Bloomcode: Application
Difficulty: Medium
Learning Objective: Apply depreciation methods to property, plant, and equipment.
Section Reference: Depreciation
CPA: Financial Reporting

Exercise 16

On October 1, 2024, Stan Auto Rentals purchases a new automobile for $30,000 to add to its fleet of rental cars. The automobiles are rented out on a short-term basis with rental fees calculated based on distance driven by the customer. Stan's policy is to sell and replace a car after the earlier of three years, or 75,000 kilometres. The average selling price of the used cars is $8,000. This particular car was driven 8,000 km in 2024, 39,000 km in 2025, and 21,000 km in 2026.

Instructions

a) Calculate 2024 and 2025 depreciation expense under each of the following methods (round all amounts to the nearest dollar):
   (i) Straight-line
   (ii) Diminishing-balance using a 40% rate
   (iii) Units-of-production

b) Which method will best match the estimated pattern in which the asset's economic benefits are expected to be consumed? Explain.

Solution 16 (10 min.)

a)

2024	2025
(i) ($30,000 – $8,000) ÷ 3 x 3/12 = $1,833	($30,000 – $8,000) ÷ 3 = $7,333
(ii) ($30,000 x 40%) x 3/12 = $3,000	($30,000 – $3,000) x 40% = $10,800
(iii) ($30,000 – $8,000) ÷ 75,000 km x 8,000 km = $2,347	($30,000 – $8,000) ÷ 75,000 km x 39,000 km = $11,440

b) Because revenue is based on units-of-production (kilometres driven), the method that will best match the estimated pattern in which the asset's economic benefits are expected to be

consumed is units-of-production.

AACSB: Analytic

Exercise 17

Sangria Boat Lifts purchased equipment on January 1, 2024, for $96,000. It is estimated that the equipment will have a $5,000 residual value at the end of its eight-year useful life. It is also estimated that the equipment will produce 100,000 units over its eight-year life.

Instructions

Answer the following independent questions.

a) Calculate the amount of depreciation expense for the year ended December 31, 2024, using the straight-line method of depreciation.
b) If 16,000 units of product are produced in 2024 and 36,000 units are produced in 2025, what is the carrying amount of the equipment at December 31, 2025, using the units-of-production depreciation method?
c) If the company uses the double diminishing-balance method of depreciation, what will be the balance of the Accumulated Depreciation–Equipment account at December 31, 2026?

Solution 17 (15 min.)

a) Straight-line method: $\frac{\$96,000 - \$5,000}{8} = \$11,375$ per year

b) Units-of-production method: $\frac{\$96,000 - \$5,000}{100,000 \text{ units}} = \$0.91$ per unit

2024	16,000 units × $0.91	=	$14,560
2025	36,000 units × $0.91	=	32,760
Accumulated depreciation		=	$47,320

Cost of asset	$96,000
Less: Accumulated depreciation	47,320
Carrying amount	$48,680

c) Double diminishing-balance method: (200%/8)

	Carrying amount Beginning of Year	×	Diminishing-Balance Rate	=	Depreciation Expense	Accumulated Depreciation
2024	$96,000		25%		$24,000	$24,000
2025	72,000		25%		18,000	42,000
2026	54,000		25%		13,500	55,500

Exercise 18

The Picnic Basket, a popular pizza restaurant, has a thriving delivery business. The Picnic Basket has a fleet of three delivery automobiles. Information related to the fleet is as follows:

Car	Cost	Residual Value	Estimated Life in Kilometres	Accumulated Depreciation Beg. of the Year	Kilometres Operated During Year
1	$18,000	$3,000	50,000	$2,100	20,000
2	15,000	2,400	60,000	1,890	22,000
3	20,000	2,500	70,000	2,000	19,000

Instructions

Using the units-of-production method:

a) Determine the depreciation rates per kilometre for each car.
b) Determine the depreciation expense for each car for the current year.
c) Make one compound journal entry to record the annual depreciation expense for the fleet.

Solution 18 (10 min.)

a) Car 1 $\frac{\$18,000 - \$3,000}{50,000 \text{ km}} = \$\ 0.30$ per km.

Car 2 $\frac{\$15,000 - \$2,400}{60,000 \text{ km}} = \$\ 0.21$ per km.

Car 3 $\frac{\$20,000 - \$2,500}{70,000 \text{ km}} = \$\ 0.25$ per km.

b) Car 1 20,000 km × $0.30 = $6,000
Car 2 22,000 km × $0.21 = $4,620
Car 3 19,000 km × $0.25 = $4,750

c)

Depreciation Expense	15,370	
Accumulated Depreciation–Vehicles (Car 1)		6,000
Accumulated Depreciation–Vehicles (Car 2)		4,620
Accumulated Depreciation–Vehicles (Car 3)		4,750

Exercise 19

The Northwood Clinic purchased a new surgical laser for $75,000. The estimated residual value is $7,500. The laser has a useful life of four years and the clinic expects to use it 10,000 hours. It was used 1,600 hours in Year 1; 2,100 hours in Year 2; 3,400 hours in Year 3; 2,900 hours in Year 4.

Instructions

a) Calculate the annual depreciation for each of the four years under each of the following methods:
   i) straight-line
   ii) units-of-production
b) If you were the administrator of the clinic, which method would you deem as most appropriate? Justify your answer.
c) Which method would result in the lowest reported profit in the first year? Which method would result in the lowest total reported profit over the four-year period?
d) Which method would result in the lowest cash flow in Year 1? Over the life of the asset?

Solution 19 (10 min.)

a)

i) Straight-line method: $\frac{\$75{,}000 - \$7{,}500}{4 \text{ years}} = \$16{,}875$ per year

ii) Units-of-production method: $\frac{\$75{,}000 - \$7{,}500}{10{,}000 \text{ hours}} = \$6.75$ per hour

Year	1	1,600 × $6.75 = $10,800
	2	2,100 × $6.75 = $14,175
	3	3,400 × $6.75 = $22,950
	4	2,900 × $6.75 = $19,575

	Straight-line	Units-of-Production
Year 1	$16,875	$10,800
Year 2	16,875	14,175
Year 3	16,875	22,950
Year 4	16,875	19,575
Total	$67,500	$67,500

b) The units-of-production method can be justified based on the variable usage the laser will receive during its useful life.

c) The straight-line method provides the highest depreciation expense for the first year, and therefore the lowest first year profit. Over the four-year period, both methods result in the same total depreciation expense ($67,500) and, therefore, the same total profit.

d) Both methods will result in the same cash flow in Year 1 and over the life of the asset. Recording depreciation expense does not affect cash flow. There is no Cash account involved in the entry to record depreciation (Dr. Depreciation Expense; Cr. Accumulated Depreciation). It is only an allocation of the capital cost to expense over an asset's useful life.

Exercise 20

Gordon's Garage purchased a specialized machine on April 1, 2024, for a total cost of $254,000 from Scissor Manufacturers. This machine is expected to become outdated and be replaced in 16 years at which time it will have a residual value of $25,000.

Instructions

a) What amount would be reported as depreciation expense for this machine on Gordon's income statement for December 31, 2024 and December 31, 2025, under the following depreciation methods? (rounded to two decimals)
   i) Straight-line method
   ii) Double diminishing-balance method
b) What is the machine's carrying amount at December 31, 2025, under both depreciation methods discussed in part a)?

Solution 20 (15 min.)

a)

i) Straight-line method

Annual Depreciation = $254,000 – $25,000/16 years = $14,312.50
2024: $14,312.50 x 9/12 months = $10,734.38
2025: $14,312.50

ii) Double diminishing-balance method

Double Diminishing Rate = 200%/16 = 12.5%

Year	Carrying amount Beginning Year	×	Depreciation Rate	=	Annual Depreciation	Accumulated Depreciation	Carrying amount
2024	$254,000.00		12.5% x 9/12		$23,812.50	$23,812.50	$230,187.50
2025	230,187.50		12.5%		28,773.44	52,585.94	201,414.06

b) Carrying amount, December 31, 2025:
   Straight-line = $ 254,000.00 – $ 10,734.38 – $ 14,312.50 = $ 228,953.12
   Double diminishing-balance = $ 201,414.06

Exercise 21

Prairie Airlines purchased a 747 aircraft on January 1, 2023, at a cost of $30,000,000. The estimated useful life of the aircraft is 20 years, with an estimated residual value of $4,000,000. On December 31, 2025, before recording 2025 depreciation, the airline revises the total estimated useful life to 15 years with a revised residual value of $3,000,000.

Instructions

a) Calculate the depreciation and carrying amount at December 31, 2024, using the straight-line method and the double diminishing-balance method.

b) Assuming the straight-line method is used, calculate the depreciation expense for the year ended December 31, 2025.

Solution 21 (20 min.)

a) Straight-line method

Year	Depreciable Cost	×	Depreciation Rate	=	Annual Depreciation	Accumulated Depreciation	Carrying amount
2023	$26,000,000		5%		$1,300,000	$1,300,000	$28,700,000
2024	26,000,000		5%		1,300,000	2,600,000	27,400,000

Double diminishing-balance method

Year	Carrying amount Beginning Year	×	Depreciation Rate	=	Annual Depreciation	Accumulated Depreciation	Carrying amount
2023	$30,000,000		10%		$3,000,000	$3,000,000	$27,000,000
2024	27,000,000		10%		2,700,000	5,700,000	24,300,000

b)

Carrying amount, December 31, 2025	$27,400,000
Less: Revised residual value	3,000,000
Depreciable cost	$24,400,000
Remaining useful life (15 years – 2 years)	13 yrs.
Revised annual depreciation	$1,876,923

Exercise 22

Winningham Company sold the following two machines in 2024:

	Machine A	Machine B
Cost	$92,000	$43,000
Purchase date	July 1, 2020	Jan. 1, 2020
Useful life	8 years	8 years
Residual value	$4,000	$3,000
Depreciation method	Straight-line	Double diminishing-balance
Date sold	July 1, 2024	Aug. 1, 2024
Sales price	$37,000	$12,000

Instructions

Journalize all entries required to update depreciation and record the sales of the two assets in 2024. The company has recorded depreciation on the machine to December 31, 2023.

Solution 22 (20 min.)

July 1	Depreciation Expense		5,500	
	Accumulated Depreciation–Equipment			5,500
	($92,000 – $4,000) ÷ 8 × 6/12 = $ 5,500			
	Cash		37,000	
	Accumulated Depreciation–Equipment A*		44,000	
	Loss on Disposal		11,000	
	Equipment A			92,000

*2020	($92,000 – $4,000) ÷ 8 × 6/12	$ 5,500
2021	($92,000 – $4,000) ÷ 8	11,000
2022		11,000
2023		11,000
2024	($92,000 – $4,000) ÷ 8 × 6/12	5,500
Total accumulated depreciation at date of disposal		$44,000

Aug. 1	Depreciation Expense		1,984	
	Accumulated Depreciation–Equipment B			1,984
	($43,000 – $29,395) × 25% × 7/12 = $1,984			
	Cash		12,000	
	Accumulated Depreciation–Equipment B**		31,379	
	Gain on Disposal			379
	Equipment			43,000

**2020	$43,000 × 25%	$10,750
2021	($43,000 – $10,750) × 25%	8,063
2022	($43,000 – $18,813) × 25%	6,047
2023	($43,000 – $24,860) × 25%	4,535
2024	($43,000 – $29,395) × 25% × 7/12	1,984
Total accumulated depreciation at date of disposal		$31,379

Exercise 23
Paper Products Inc. sold two pieces of machinery equipment in 2024. The following information pertains to the two machines:

Machine	Cost	Purchase Date	Useful Life	Residual Value	Depreciation Method	Date Sold	Sales Price
#1	$86,000	7/1/20	5 yrs.	$6,000	Straight-line	7/1/24	$20,000
#2	$50,000	7/1/23	5 yrs.	$5,000	Double diminishing-balance	12/31/24	$32,000

Instructions
a) Calculate the accumulated depreciation on each machine at the date of disposal.
b) Prepare the journal entries in 2024 to record 2024 depreciation and the sale of each machine.

Solution 23 (20 min.)
a) Machine #1

Year	Depreciable Cost	×	Depreciation Rate	=	Annual Depreciation	Accumulated Depreciation
2020	$80,000		20%		$ 8,000*	$ 8,000
2021	80,000		20%		16,000	24,000
2022	80,000		20%		16,000	40,000
2023	80,000		20%		16,000	56,000
2024	80,000		20%		8,000*	64,000

*One-half a year.

Machine #2

Year	Carrying amount Beginning of Year	×	DDB Rate	Annual Depreciation	Accumulated Depreciation
2023	$50,000		40%	$10,000*	$10,000
2024	40,000		40%	16,000	26,000

*One-half a year.

b)

	Machine 1		Machine 2	
Depreciation Expense	8,000		16,000	
Accumulated Depreciation–Equipment		8,000		16,000
Cash	20,000		32,000	
Loss on Disposal	2,000*		-0-	
Accumulated Depreciation–Equipment	64,000		26,000	
Equipment		86,000		50,000
Gain on Disposal		-0-		8,000**

*NBV: $86,000 – $64,000 = $22,000; Proceeds – NBV: $20,000 – $22,000 = -$2,000 [a loss]
**NBV: $50,000 – $26,000 = $24,000; Proceeds – NBV: $32,000 – $24,000 = $8,000 [a gain]

Exercise 24

Mendelsohn Company purchased equipment on January 1, 2024, at a cost of $48,000. The equipment is expected to have an estimated residual value of $3,000 at the end of its five-year life. The company's new accountant has used the double diminishing-balance method to depreciate the equipment at December 31, 2024. However, the company has a policy of using the straight-line method to depreciate equipment. Profit for the year ended December 31, 2024, was $55,000 as the result of depreciating the equipment incorrectly.

Instructions

Using the method of depreciation that the company normally follows, prepare the correcting entry and determine the correct profit. (Show calculations.)

Solution 24 (10 min.)

Depreciation recorded: ($48,000 – $0) × 40%	$19,200
Correct depreciation: ($48,000 – $3,000) ÷ 5 yrs	9,000
Overstatement of depreciation in 2024	$10,200

Accumulated Depreciation–Equipment	10,200	
Depreciation Expense		10,200

Correct profit:

Profit as reported	$55,000
Add: Overstatement of depreciation expense	10,200
Correct profit	$65,200

Bloomcode: Application
Difficulty: Medium
Learning Objective: Explain the factors that cause changes in periodic depreciation and calculate revised depreciation for property, plant, and equipment.
Section Reference: Revising Periodic Depreciation
CPA: Financial Reporting
AACSB: Analytic

Exercise 25

Equipment was acquired on January 1, 2022, at a cost of $90,000. The equipment was originally estimated to have a residual value of $5,000 and an estimated life of 10 years. Depreciation has been recorded through December 31, 2023, using the straight-line method. On December 31, 2024, before recording 2024 depreciation, the estimated residual value was revised to $6,000 and the

useful life was revised to a total of eight years.

Instructions
Determine the depreciation expense for 2024.

Solution 25 (5 min.)
Calculate the carrying amount at the time of the revision:

$\frac{\$90{,}000 - \$5{,}000}{10 \text{ years}} = \$8{,}500$ annual depreciation expense

Two years have been depreciated: $\$8{,}500 \times 2 = \$17{,}000$

Carrying amount at the time of the revision: $\$90{,}000 - \$17{,}000 = \$73{,}000$

Calculate the revised annual depreciation:

$\frac{\$73{,}000 - \$6{,}000}{6 \text{ years remaining}} = \$11{,}167$ revised annual depreciation

The depreciation expense for 2024 is $11,167.

Bloomcode: Application
Difficulty: Medium
Learning Objective: Explain the factors that cause changes in periodic depreciation and calculate revised depreciation for property, plant, and equipment.

Exercise 26
On January 1, 2023, Katsumi Company purchased and installed a telephone system at a cost of $20,000. The equipment was expected to last five years with a residual value of $3,000. On January 1, 2024, more telephone equipment was purchased to compliment the current system for $8,000. The new equipment is expected to have a useful life of four years. Through an error, the new equipment was debited to Telephone Expense. Katsumi Company uses the straight-line method of depreciation.

Instructions
Prepare a schedule as follows showing the effects of the error on Telephone Expense, Depreciation Expense, and profit for each year and in total beginning in 2024 through the useful life of the new equipment.

Year	Telephone Expense Overstated (Understated)	Depreciation Expense Overstated (Understated)	Profit Overstated (Understated)
2024			

2025
2026
2027

Solution 26 (25 min.)

Year	Telephone Expense Overstated (Understated)	Depreciation Expense Overstated (Understated)	Profit Overstated (Understated)
2024	$8,000	$(2,000)	$(6,000)
2025		(2,000)	2,000
2026		(2,000)	2,000
2027		(2,000)	2,000
Total	$8,000	$(8,000)	$ -0-

Exercise 27
Harrison Rentals purchased an apartment building in January 2016. At the time, the building was expected to have a useful life of 25 years with a residual value of $100,000, during which time it was projected to generate annual rentals of $30,000). The building's original cost was $500,000.

At January 1, 2024, the accumulated depreciation balance on this building was $128,000, and 2024 depreciation has been recorded as $16,000. Harrison has a December 31 year end.

During December 2024 Harrison had the following events and transactions related to the building. All transactions are for cash.

1. Painted all the walls in the common areas at a cost of $8,000.
2. Replaced the electrical wiring in three suites due to safety concerns at a cost of $4,500.
3. Replaced all of the linoleum flooring in the suites with hardwood, installed in-suite laundry facilities in each unit, and made other improvements at total cost of $120,000. As a result, the annual rental revenue has been doubled.
4. Completed structural repairs to the building at a cost of $100,000. As a result of this work the building life is expected to be 10 years longer than the original estimate. The residual value estimate has been revised to $134,000.

Instructions

a) Calculate the carrying amount of the building on December 31, 2024. Provide explanations for any increases to building cost.
b) Record the 2025 depreciation expense using the straight-line basis, assuming that the increased rental rates go into effect January 1, 2025.

Solution 27 (15 min.)
a)

Building cost, balance January 1, 2024		$500,000
Add: Item 3 (new flooring and laundries are added to the cost because they increase the building's revenue-generating capacity)		120,000
Item 4 (structural repairs are added to the cost because this extends the useful life of the building)		100,000
		720,000
Less: Accumulated depreciation ($128,000 + $16,000)		144,000
Carrying amount, December 31, 2024		$576,000

b)

Revised depreciable cost ($576,000 – $134,000)	$ 442,000
Remaining life (from Jan. 1, 2025) = (25 – 9 + 10)	26
2025 depreciation expense = $442,000 ÷ 26	$ 17,000

Depreciation Expense	17,000	
Accumulated Depreciation–Building		17,000

Bloomcode: Application
Difficulty: Medium
Learning Objective: Explain the factors that cause changes in periodic depreciation and calculate revised depreciation for property, plant, and equipment.

Exercise 28
At January 1, 2024, Penner Auto Repairs owned the following assets:

Asset	Building	Automobiles	Computers	Furniture
Date purchased	Jan. 1, 2017	Jan. 1, 2023	Jan. 1, 2023	Jan. 1, 2017
Original cost	$500,000	$45,000	$10,000	$20,000
Depreciation method	Straight-line	Diminishing-balance	Straight-line	Straight-line
Useful life/Depreciation rate	40 years	45%	3 years	15 years
Estimated residual value	$200,000	not applicable	$1,000	$4,000
Estimated remaining life (as of January 1, 2024)	33 years	not applicable	2 years	8 years

Prior to recording depreciation expense for 2024, Penner undertook a review of the assets'

remaining life and value and determined that the following changes are warranted based on currently available information:

Building:	No changes
Automotive:	No changes
Computers:	Obsolete
Furniture:	Remaining life will be 10 years with $5,000 residual value.

Instructions
Calculate 2024 depreciation on each of these assets, taking the new information into account. Round all amounts to the nearest dollar.

Solution 28 (20 min.)

Building

Cost	$500,000
Residual value	$200,000
Depreciable value	$300,000
Estimated life	40 years
2024 depreciation expense ($300,000 ÷ 40)	$7,500

Automobile

Cost	$45,000
2023 depreciation ($45,000 x 45%)	$20,250
Carrying amount Jan. 1, 2024	$24,750
Depreciation rate	45%
2024 depreciation expense ($24,750 x 45%)	$11,138

Computers

Cost	$10,000
Accumulated depreciation Jan 1, 2024 ($10,000 – $1,000) ÷ 3 x 1	$3,000
Carrying amount Jan. 1, 2024	$7,000
Revised residual value	$-0-
Revised depreciable cost	$7,000
Remaining life	0 years
2024 depreciation expense ($7,000 ÷ 1 year)	$7,000

Furniture

Cost	$20,000
Accumulated depreciation Jan. 1/24 ($20,000 – $4,000) ÷ 15 x 7	$7,467
Carrying amount Jan. 1/24	$12,533
Revised residual value	$5,000
Revised depreciable cost	$7,533
Remaining life	10 years
2024 depreciation expense	$753

Bloomcode: Application
Difficulty: Medium
Learning Objective: Explain the factors that cause changes in periodic depreciation and calculate revised depreciation for property, plant, and equipment.
Section Reference: Revising Periodic Depreciation

CPA: Financial Reporting
AACSB: Analytic

Exercise 29
Redwood Company performs an assessment annually for possible impairment losses and has gathered the following information pertaining to selected assets at December 31, 2024:

Asset	Building	Equipment	Computers	Furniture
Original cost	$400,000	$245,000	$100,000	$20,000
Accumulated depreciation	220,000	16,000	20,000	13,000
Recoverable amount	550,000	225,000	70,000	8,000
Impairment loss (if any)	?	?	?	?

Instructions
Determine if the assets identified by Redwood are impaired and prepare any necessary adjusting entries to record the impairments.

Solution 29 (10 min.)

Asset	Building	Equipment	Computers	Furniture
Original cost	$400,000	$245,000	$100,000	$20,000
Accumulated depreciation	220,000	16,000	20,000	13,000
Recoverable amount	550,000	225,000	70,000	8,000
Impairment loss (if any)	0	4,000	10,000	0

2024	Dec. 31	Impairment Loss.....	14,000	
		Accumulated Depreciation–Equipment		4,000
		Accumulated Depreciation–Equipment (Computers)		10,000

Carrying amount = $345,000 – $16,000 – $20,000 = $309,000
Impairment loss = $309,000 – $295,000 = $14,000

Bloomcode: Application
Difficulty: Medium
Learning Objective: Explain the factors that cause changes in periodic depreciation and calculate revised depreciation for property, plant, and equipment.
Section Reference: Revising Periodic Depreciation

Exercise 30
The following assets were sold by DNC Company during the 2024 fiscal year. The company's year end is December 31.

Asset	Vehicles	Equipment	Furniture
Original cost	$60,000	$8,000	$18,000
Accumulated depreciation (December 31, 2023)	$35,000	$7,000	$7,000

Depreciation method	Diminishing-balance	Straight-line	Straight-line
Depreciation rate/years remaining	25%	2 years	8 years
Estimated residual value	not applicable	not applicable	not applicable
Selling price	$22,500	$708	$14,000
Date of sale in 2024	April 1	August 1	October 31

Instructions
Calculate the gain or loss on disposal for each asset sold and prepare any necessary journal entries to record the disposals for DNC. (Round to the nearest dollar)

Solution 30 (15 min.)

Apr. 1	Depreciation Expense		1,563	
	Accumulated Depreciation–Vehicles			1,563
	($60,000 – $35,000) × 25% × 3/12 = $1,563			
	Cash		22,500	
	Accumulated Depreciation–Vehicles ($35,000 + $1,563)		36,563	
	Loss on Disposal		937	
	Vehicles			60,000
Aug. 1	Depreciation Expense		292	
	Accumulated Depreciation–Equipment			292
	[($8,000 – $7,000)/2 x 7/12] = $ 292			
	Cash		708	
	Accumulated Depreciation– Equipment ($7,000 + $292)		7,292	
	Equipment			8,000
Oct. 31	Depreciation Expense		1,146	
	Accumulated Depreciation–Furniture			1,146
	($18,000 – $7,000)/8 × 10/12 = $ 1,146			
	Cash		14,000	
	Accumulated Depreciation–Furniture ($7,000 + $1,146)		8,146	
	Gain on Disposal			4,146
	Furniture			18,000

Bloomcode: Application
Difficulty: Medium
Learning Objective: Demonstrate how to account for property, plant, and equipment disposals.
Section Reference: Disposal of Property, Plant, and Equipment
CPA: Financial Reporting
AACSB: Analytic

Exercise 31

1. Lui Company purchased equipment in 2017 for $80,000 and estimated an $8,000 residual value at the end of the equipment's 10-year useful life. At December 31, 2023, there was $50,400 in the Accumulated Depreciation account for this equipment using the straight-line

method of depreciation. On March 31, 2024, the equipment was sold for $21,000. Prepare the appropriate journal entries to record the sale of the equipment for Lui Company.

2. Gagne Company sold a delivery truck for $11,000. The delivery truck originally cost $25,000 in 2020 and $6,000 was spent on a major overhaul in 2021 (charged to the Vehicles account). Accumulated depreciation on the delivery truck to the date of disposal was $20,000. Prepare the appropriate journal entry to record the disposition of the delivery truck.
3. Crenshaw Company sold office equipment that had a carrying amount of $4,500 for $6,000. The office equipment originally cost $15,000 and it is estimated that it would cost $19,000 to replace the office equipment. Prepare the appropriate journal entry to record the disposition of the office equipment.

Solution 31 (15 min.)

1.	Depreciation Expense	1,800	
	Accumulated Depreciation–Equipment		1,800
	To record depreciation expense for the first three months of 2024. ($72,000 ÷ 10 × 3/12) = $1,800		
	Cash	21,000	
	Loss on Disposal	6,800	
	Accumulated Depreciation–Equipment ($50,400 + $1,800)	52,200	
	Equipment		80,000
	To record sale of equipment at a loss		
2.	Cash	11,000	
	Accumulated Depreciation–Vehicles	20,000	
	Vehicles ($25,000 + $6,000)		31,000
	To record disposition on delivery truck at carrying amount.		
3.	Cash	6,000	
	Accumulated Depreciation–Equipment	10,500	
	Equipment		15,000
	Gain on Disposal		1,500
	To record disposal of office equipment at a gain.		

Bloomcode: Application
Difficulty: Medium
Learning Objective: Demonstrate how to account for property, plant, and equipment disposals.
Section Reference: Disposal of Property, Plant, and Equipment
CPA: Financial Reporting
AACSB: Analytic

Exercise 32

Zedel Delivery Services has a December 31, 2024, year end. On January 1, 2024, Zedel has a delivery van with a cost of $35,000 and accumulated depreciation of $12,000. The van was expected to have a residual value of $5,000 and a useful life of five years. Zedel uses straight-line depreciation. Zedel plans to replace its delivery van on April 1, 2024, and is considering two alternatives:

1. Zedel has been offered $14,000 for the old van. If Zedel accepts this offer, Zedel would then purchase a replacement for $50,000 cash.

2. Trade the old van for a new one. The dealer will allow a $22,000 trade-in allowance on the old van, and Zedel will have to pay additional cash of $28,000.

Instructions

a) Record the updated depreciation on the old van to April 1, 2024.
b) Record the disposal of the van under each of the two alternatives.
c) Which alternative do you recommend and why?

Solution 32 (15 min.)

a) Depreciation Jan. 1 – Apr. 1, 2024:
($35,000 – $5,000) ÷ 5 x 3/12 = $1,500

Apr.	1	Depreciation Expense	1,500	
		Accumulated Depreciation–Vehicles		1,500

b)

Option 1:

	Cash	14,000	
	Accumulated Depreciation–Vehicles ($12,000 + $1,500)	13,500	
	Loss on Disposal	7,500	
	Vehicles (old)		35,000
	Vehicles (new)	50,000	
	Cash		50,000

Option 2:

	Vehicles (new) ($22,000 + $28,000)	50,000	
	Accumulated Depreciation–Vehicles	13,500	
	Gain on Disposal		500
	Vehicles (old)		35,000
	Cash		28,000

c) Cash required for alternative #1 ($50,000 – $14,000) = $36,000.
Cash required for alternative #2 = $28,000.

Because the second option requires less cash to acquire the same van, it is the recommended option.

Bloomcode: Application
Difficulty: Medium
Learning Objective: Demonstrate how to account for property, plant, and equipment disposals.
Section Reference: Disposal of Property, Plant, and Equipment
CPA: Financial Reporting
AACSB: Analytic

Exercise 33

Presented below are selected transactions for Donald Company for 2024:

Jan. 1 Received $3,000 scrap value on retirement of equipment that was purchased on January

1, 2013. The equipment cost $80,000 on that date, and had an estimated useful life of 10 years with no residual value.

Apr. 30 Sold equipment for $50,000 that was purchased on January 1, 2021. The equipment cost $90,000, and had an estimated useful life of five years with no residual value.

Dec. 31 Scrapped a business automobile that was purchased on September 1, 2019. The car cost $20,000 and was depreciated on an eight-year useful life with a residual value of $800.

Instructions

Journalize all entries required as a result of the above transactions. Donald Company uses the straight-line method of depreciation and has recorded depreciation to December 31, 2023.

Solution 33 (15 min.)

Jan. 1	Cash	3,000	
	Accumulated Depreciation–Equipment	80,000	
	Equipment		80,000
	Gain on Disposal		3,000
Apr. 30	Depreciation Expense	6,000	
	Accumulated Depreciation–Equipment		6,000
	($90,000 ÷ 5) × 4/12 = $6,000		
	Cash	50,000	
	Accumulated Depreciation–Equipment	60,000	
	($18,000 × 3) + $6,000		
	Equipment		90,000
	Gain on Disposal ($50,000 – $30,000)		20,000
Dec. 31	Depreciation Expense	2,400	
	Accumulated Depreciation–Vehicles		2,400
	($20,000 – $800) ÷ 8 = $2,400		
	Accumulated Depreciation–Vehicles	12,800	
	($2,400 × 5) + ($2,400 x 1/3)		
	Loss on Disposal	7,200	
	Vehicles		20,000

Bloomcode: Application
Difficulty: Medium
Learning Objective: Demonstrate how to account for property, plant, and equipment disposals.
Section Reference: Disposal of Property, Plant, and Equipment
CPA: Financial Reporting
AACSB: Analytic

Exercise 34

On January 1, 2024, Jelly Stone Industries invested $2,000,000 in land that includes a stand of timber and the rights to cut the timber. The property is expected to yield 50,000 cubic metres of timber. After the amount of lumber permitted by law has been cut, Jelly Stone expects to be able to sell the land for $400,000 less $150,000 that must be spent on reforestation. Jelly Stone invested a further $300,000 in equipment that is expected to last for the same number of units as the property

yields, with no residual value.

Instructions

a) Using the units-of-production method, calculate depletion/depreciation for 2024 on both the timber investment and for the equipment, assuming that 12,000 cubic metres are sawn in the year.
b) Explain why the units-of-production method is considered the most appropriate method for depletion of natural resources.

Solution 34 (10 min.)

a) Depletion of timber:
($2,000,000 – [$400,000 – $150,000]) ÷ 50,000 = $35 per cubic metre; $35 x 12,000 = $420,000

Depreciation of equipment:
$300,000 ÷ 50,000 = $6 per cubic metre; $6 x 12,000 = $72,000

b) The units-of-production method is considered appropriate because the cost of the asset is matched exactly with the asset being physically used up. This will also result in a good matching of expenses with revenues, which are also determined on a per-unit basis.

Bloomcode: Application
Difficulty: Medium
Learning Objective: Record natural resource transactions and calculate depletion.
Section Reference: Natural Resources
CPA: Financial Reporting
AACSB: Analytic

Exercise 35

Johansan Mining Company purchased a mine for $80 million, which is estimated to have 250,000 tonnes of ore and a residual value of $10 million. In the first year, 50,000 tonnes of ore are extracted and sold. In the second year, 150,000 tonnes of ore are extracted but only 125,000 tonnes are sold.

Instructions

a) Prepare the journal entry to record depletion expense for the first year and the second year.
b) What amount and in what account are the tonnes of ore not sold reported?

Solution 35 (10 min.)

a) Calculation of the depletion expense/tonne of ore:
($80,000,000 – $10,000,000) ÷ 250,000 tonnes = $280 per tonne

First year: 50,000 tonnes × $280 = $14,000,000

Inventory	14,000,000	
Accumulated Depletion–Resource		14,000,000

b) Second year: 150,000 tonnes × $280 = $42,000,000

Inventory	42,000,000	

	Accumulated Depletion–Resource	42,000,000

Note: Depletion is recorded for the full amount extracted.

The ore that is extracted and not sold remains in an Inventory account in the current assets section of the balance sheet. In this case $7,000,000 (25,000 × $280) should be reported as inventory. The amount related to the ore that is extracted and sold [$35,000,000 = 125,000 x $280] will be transferred to the Cost of Goods Sold account along with all the other costs of extracting the ore.

Bloomcode: Application
Difficulty: Medium
Learning Objective: Record natural resource transactions and calculate depletion.
Section Reference: Natural Resources
CPA: Financial Reporting
AACSB: Analytic

Exercise 36

McGuinness Mining Company purchased land containing an estimated 15 million tonnes of ore at a cost of $5,400,000. The land without the ore is estimated to be worth $600,000. The company expects to operate the mine for 10 years. Buildings costing $800,000 are erected on the site and are depreciated over the life of the mine. Equipment costing $1,000,000 is depreciated over the life of the mine. The buildings and the equipment possess no residual value after the mine is closed. During the first year of operations, the mining company mined and sold 2 million tonnes of ore.

Instructions

a) Calculate the depletion cost per tonne of the mine.
b) Calculate the depletion expense for the first year on the mine.

Solution 36 (20 min.)

a) Depletion cost per tonne:
($5,400,000 – $600,000) ÷ 15 million tonnes of ore = $0.32 per tonne

b) 2,000,000 tonnes × $0.32 = $640,000

Bloomcode: Application
Difficulty: Medium
Learning Objective: Record natural resource transactions and calculate depletion.
Section Reference: Natural Resources
CPA: Financial Reporting
AACSB: Analytic

Exercise 37

Kewais Company invested $6 million for the rights to explore and extract natural resources from land in Ukraine. The company estimated that a total of 1.5 million tonnes of ore would be extracted from the property. The company extracted 50,000 tonnes of ore in year 1, 110,000 tonnes of ore in year 2, and 205,000 tonnes of ore in year 3.

Instructions
Prepare the necessary journal entries to record depletion expense in all three years.

Solution 37 (5 min.)
Depletion rate = $6,000,000/1,500,000 tonnes = $4 per tonne of ore extracted

Year 1	Inventory ($4 x 50,000)	200,000	
	Accumulated Depletion–Resource		200,000
Year 2	Inventory ($4 x 110,000)	440,000	
	Accumulated Depletion–Resource		440,000
Year 3	Inventory ($4 x 205,000)	820,000	
	Accumulated Depletion–Resource		820,000

Bloomcode: Application
Difficulty: Medium
Learning Objective: Record natural resource transactions and calculate depletion.
Section Reference: Natural Resources
CPA: Financial Reporting
AACSB: Analytic

Exercise 38
Below are several transactions for McLaughlin Inc.:

1. Timber rights were purchased on a tract of land for $600,000. The timber is estimated at 2,800 cubic metres. During the current year, 180 cubic metres of timber were cut and sold.
2. A company purchased another company on July 1 and recorded goodwill of $400,000.
3. Costs of $18,000 were incurred on January 1 to obtain a patent. Shortly thereafter, $9,000 was spent in legal costs to successfully defend the patent against competitors. The patent has a legal life of 20 years and an estimated nine-year useful life.
4. The company acquired a trademark for the cost of $25,000. The trademark has 20 years until it expires and then it can be renewed for another 20 years for the cost of $25.

Instructions
For each of the unrelated transactions, determine the amount of the depreciation, depletion, or amortization expense for the current year and present the adjusting entries required to record each expense at year end.

Solution 38 (10 min.)

1. Calculation of depletion/cubic metre:
   $600,000 ÷ 2,800 = $214.29/cubic metre
   180 × $214.29 = $38,572

Inventory	38,572	
Accumulated Depletion–Resource		38,572

2. No entry. Goodwill is not amortized.

3. Legal costs to successfully defend a patent are capitalized.

Amortization Expense	3,000	
Accumulated Amortization–Patent		3,000
($27,000 ÷ 9 years = $3,000)		

4. No amortization is necessary. The trademark can be renewed for a small cost and thus it may be treated as if it has indefinite life.

Bloomcode: Application
Difficulty: Medium
Learning Objective: Record natural resource transactions and calculate depletion.
Section Reference: Natural Resources
Learning Objective: Identify the basic accounting issues for intangible assets and goodwill.
Section Reference: Intangible Assets and Goodwill
CPA: Financial Reporting
AACSB: Analytic

Exercise 39

During the current year, Lui Company incurred several expenditures:

1. Spent $50,000 in legal costs in a patent defence suit. The patent was unsuccessfully defended.
2. Purchased a trademark from another company. The trademark can be renewed indefinitely. Lui Company expected the trademark to contribute to revenue indefinitely.
3. Lui Company acquired a patent for $2,000,000. The company selling the patent has spent $1,000,000 on the research and development of it. The patent has a remaining legal life of 15 years and an estimated five-year useful life.
4. Lui Company is spending considerable time and money in developing a different patent for another product. So far, $3,000,000 has been spent this year on research. Lui Company is very confident it will obtain this patent in the next few years.

Instructions

Briefly explain whether the expenditures listed above should be recorded as an operating expense or as an intangible asset. If you view the expenditure as an intangible asset, indicate whether the asset should be amortized or not, and if so, the number of years over which it should be amortized. Explain your answer.

Solution 39 (10 min.)

1. Operating expense. Only successful patent defence costs can be capitalized.

2. Intangible asset. Trademarks are renewable. Since Lui Company expects to use the trademark indefinitely, no amortization is recorded.

3. Intangible asset. The patent cost of $2,000,000 should be amortized over its expected remaining useful life of five years since this is shorter than the remaining legal life of 15 years.

4. Operating expense. Research costs should be expensed when incurred.

Bloomcode: Analysis
Difficulty: Medium
Learning Objective: Identify the basic accounting issues for intangible assets and goodwill.

Section Reference: Intangible Assets and Goodwill

AACSB: Analytic

Exercise 40

1. A company purchased a patent on January 1, 2024, for $2,500,000. The patent's legal life is 20 years but the company estimates that the patent's useful life will only be five years from the date of acquisition. On June 30, 2024, the company paid legal costs of $162,000 in successfully defending the patent in an infringement suit. Prepare the journal entry to amortize the patent at year end on December 31, 2024.
2. Walker Company purchased a franchise from Tasty Food Company for $400,000 on January 1, 2024. The franchise is for an indefinite time period and gives Walker Company the exclusive rights to sell Tasty Wings in a particular territory. Prepare the journal entry to record the acquisition of the franchise and any necessary adjusting entry at year end on December 31, 2024.
3. Chernomyrdin Company incurred research costs of $200,000 and successful development costs of $500,000 in 2024 in developing a new product that the company was able to patent in early January 2024. The company expects the product to be useful for 10 years. Prepare the necessary journal entries during 2024 to record these events and any adjustments at year end on December 31, 2024.

Solution 40 (15 min.)

1. December 31, 2024

Amortization Expense		518,000	
Accumulated Amortization–Patent			518,000
To record patent amortization			
$2,500,000 ÷ 5 years	$500,000		
$162,000 ÷ 54 months = $3,000 × 6 months	18,000		
	$518,000		

2. January 1, 2024

Franchise	400,000	
Cash		400,000
To record acquisition of Tasty Food franchise.		

December 31, 2024
Indefinite life, no amortization necessary; no entry.

3. 2024

Research Expense	200,000	
Cash		200,000
To record research expense for the current year.		
Patent	500,000	
Cash		500,000
To capitalize development costs.		

December 31, 2024

Amortization Expense ($500,000 ÷ 10 years)	50,000	
Accumulated Amortization–Patent		50,000
To record amortization of successful development costs relating to the patent.

Exercise 42

During 2024 Blackmud Research had the following transactions for cash. This is Blackmud's first year of operations.

Mar. 1 Registered a new patent, with a legal life of 20 years, at a cost of $30,000.

June 30 Incurred research costs of $68,000.

Aug. 1 Incurred development costs of $50,000 related to a product that meets the standards required for capitalization of costs. The costs are expected to provide commercial benefits for five years.

Aug. 31 Purchased a trademark with an indefinite life for $102,000.

Nov. 1 Purchased software copyright for $300,000. The copyright has a remaining legal life of 30 years, and the related software is expected to produce revenue for six years.

Instructions

a) Record the transactions.

b) Prepare the section of the December 31, 2024, balance sheet of Blackmud Research that reports intangible assets. Show calculations where applicable.

Solution 42 (20 min.)

a)

Mar. 1	Patent	30,000	
	Cash		30,000
June 30	Research Expense	68,000	
	Cash		68,000
Aug. 1	Development Costs	50,000	
	Cash		50,000
Aug. 31	Trademark	102,000	
	Cash		102,000
Nov. 1	Copyright	300,000	
	Cash		300,000

b)

BLACKMUD RESEARCH
Balance Sheet (partial)
December 31, 2024

Intangible assets (non-current assets)		
Finite-life intangible assets ($30,000 + $50,000 + $300,000)	$380,000	
Less: Accumulated amortization*	13,750	$366,250
Indefinite-life intangible assets		102,000
Total intangible assets		$468,250

Amortization:

Patent = ($30,000 ÷ 20 x 10/12)	$ 1,250
Development costs ($50,000 ÷ 5 x 5/12)	4,167
Copyright ($300,000 ÷ 6 x 2/12)	8,333
Total	$13,750

Bloomcode: Application

Exercise 43

The following information is available from the audited financial statements of Molson Coors Brewing Company and Big Rock Breweries Income Trust for their year ends.

	Molson/Coors (in millions of US dollars)	Big Rock Breweries (in thousands of Cdn. dollars)
Net revenue	$ 5,844	$ 38,701
Profit	373	8,380
Total assets, ending	11,603	42,170
Total assets, beginning	11,799	41,786

Instructions

a) Calculate both companies' asset turnover and return on assets. Round to two decimal places.
b) Compare the companies' effectiveness in using their assets to produce revenue and profit.

Solution 43 (10 min.)
a)

	Molson/Coors	Big Rock
Asset turnover	$5,844 ÷ [($11,603 + $11,799) ÷2] = 0.50 times	$38,701 ÷ [($42,170 + $41,786) ÷2] = 0.92 times
Return on assets	$373 ÷ [($11,603 + $11,799) ÷2] = 3.19%	$8,380 ÷ [($42,170 + $41,786) ÷2] = 19.96%

b) Big Rock's performance in asset management is better when measured by either of the two ratios. This suggests that Big Rock is more effective in using its assets to generate revenue and profit even though it is a smaller company.

Exercise 44

Presented below is information related to long-lived assets at year end on December 31, 2024, for Jankowski Company:

Buildings	$1,080,000
Goodwill	420,000
Patents	600,000
Coal mine	390,000
Accumulated depreciation–building	670,000
Accumulated depletion–coal mine	275,000
Accumulated amortization–patents	120,000

Instructions

Prepare a partial balance sheet for Jankowski Company that shows how the above listed items would be presented.

Solution 44 (10 min.)

JANKOWSKI COMPANY
Balance Sheet (Partial)
December 31, 2024

Property, Plant, and Equipment		
Buildings	$1,080,000	
Less: Accumulated depreciation–buildings	670,000	$ 410,000
Coal mine	390,000	
Less: Accumulated depletion–resource	275,000	115,000
Total property, plant, and equipment		525,000
Intangible Assets		
Patents	600,000	
Less: Accumulated amortization–patents	120,000	
Total Intangible Assets		480,000
Goodwill		420,000
Total long-lived assets		$1,425,000

AACSB: Analytic

Exercise 45

Indicate in the blank spaces below, the appropriate group heading for financial reporting purposes.

Use the following code to identify your answer:

PPE	Property, Plant, and Equipment
NR	Natural Resources
I	Intangible Assets
O	Other
N/A	Not on the balance sheet

_____ 1. Goodwill

_____ 2. Land improvements

_____ 3. Development costs for a patented product

_____ 4. Accumulated depreciation–buildings

_____ 5. Trademarks

_____ 6. Research costs

_____ 7. Timberlands

_____ 8. Franchises

_____ 9. Licences

_____ 10. Equipment

_____ 11. Depreciation expense

_____ 12. Land

Solution 45 (5 min.)

1. O Goodwill
2. PPE Land improvements
3. I Development costs for a patented product
4. PPE Accumulated depreciation–buildings
5. I Trademarks
6. N/A Research costs
7. NR Timberlands
8. I Franchises
9. I Licences
10. PPE Equipment
11. N/A Depreciation expense
12. PPE or NR Land

Exercise 46

Net sales were $1,500,000 and profit was $250,000 in the second year of operation for Tirekicker's Used Car Company. Total assets in the first year were $800,000 and in the second year $1,200,000.

Instructions

a) Determine the asset turnover and the return on assets for Tirekicker's Used Car Company.
b) What do these ratios show?

Solution 46 (5 min.)

a) Asset turnover = Net sales ÷ Average assets
= $1,500,000 ÷ [($800,000 + $1,200,000) ÷ 2)] = 1.5 times

Return on assets = Profit ÷ Average assets
= $250,000 ÷ [($800,000 + $1,200,000) ÷ 2)] = 25%

b) The asset turnover ratio shows how efficiently a company uses its assets to generate sales revenue. The return on assets ratio shows the profitability of assets used in the earning process.

Exercise 47

The following information is taken from the records of Wasp Industrial Ltd.

	2025	2024	2023
Total assets reported at year end	$14,110,500	$12,083,700	$10,669,900
Sales revenue	2,037,210	2,097,100	2,120,500
Sales discounts	14,521	17,554	16,808
Total expenses	875,770	890,425	925,860

Instructions

a) Calculate the 2025 and 2024 asset turnover and return on assets.
b) Briefly interpret the results of each ratio examined in part a).

Solution 47 (10 min.)

a) 2025 asset turnover =
($2,037,210 – $14,521) ÷ [($14,110,500 + $12,083,700) ÷ 2] = 0.15

2024 asset turnover =
($2,097,100 – $17,554) ÷ [($12,083,700 + $10,669,900) ÷ 2] = 0.18

2025 return on assets =
($2,037,210 – $14,521 – $875,770)/[($14,110,500 + $12,083,700) ÷ 2] = 0.09

2024 return on assets =
($2,097,100 – $17,554 – $890,425)/[($12,083,700 + $10,669,900) ÷ 2] = 0.10

b) The asset turnover ratio suggests that for each dollar that Wasp has invested in assets, it produced $0.15 (2025) and $0.18 (2024) in sales. This demonstrates a declining trend that should be closely compared to the industry average.
The return on assets ratio suggests that Wasp generated profits of 9% (2025) and 10% (2024) for every dollar invested in assets. This demonstrates a declining trend that should be closely compared to the industry average.
